## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct on-line access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,  
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9606) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

## Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolinguée et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Section des industries de biens et de services,  
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9606) ou au centre de consultation de Statistique Canada à:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, **aux utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

## Note of Appreciation

*Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.*

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- <sup>P</sup> preliminary figures.
- <sup>r</sup> revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613)951-8200.

® Registered Trade Mark of Statistics Canada.

### Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Robin Lowe**, Chief, Goods & Services Producing Industries Section.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- <sup>P</sup> nombres provisoires.
- <sup>r</sup> nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6, ou téléphonez à (613)951-8200.

® Marque déposée de Statistique Canada.

### Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Robin Lowe**, Chef, Section des Industries de biens et de services.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48 - 1984.

## Highlights

### First Quarter 1994

#### Farm Input Price Index (FIPI)

The Farm Input Price Index (FIPI, 1986=100) for the first quarter of 1994 stood at a preliminary level of 116.2, up 1.5% from the previous quarter and 4.2% from a year earlier. Of the nine major groups indexes composing the FIPI, seven increased in the first quarter and two declined.

- The animal production index rose by 2.5% over the quarter mainly because of higher prices for feed (5.2%). This increase was recorded in Eastern Canada (6.0%) as well as Western Canada (3.9%). The animal production index was up 9.8% higher than a year ago due primarily to increases in the feeder livestock index (10.6%) and the feed index (9.2%).
- The machinery and motor vehicles index increased by 1.6% for the quarter as two of its component indexes rose. The largest quarterly change was recorded by the machinery replacement index (3.5%) where both powered and nonpowered machinery were up by 3.8% and 2.6% respectively. On a year-to-year basis, the machinery and motor vehicles index increased by 3.3% with the major contributor being the machinery replacement index which rose by 6.0%.
- The crop production index increased by 1.2% primarily due to higher prices for grains and oil seeds (5.2%) and legume and grass (5.4%). Western Canada had the largest increases with grains and oil seeds going up by 9.1% and legume and grass seed rising by 6.9%. The crop production index was up by 5.0% from last year mainly due to higher prices for legume and grass seed (13.2%).
- The index for interest had an offsetting effect on the total quarterly change. It declined by 1.0% as the mortgage index dropped by 0.5% and the non-mortgage component decreased by 2.4%. The interest index was 10.1% below its level in the first quarter of 1993.
- The Eastern Canada total index increased 1.5% over the quarter. The pattern of changes was similar to that at the national level. The most significant increases occurred in the animal production index (3.2%) as weanling pigs prices and feed prices rose by 6.9% and 6.0% respectively. The total index for Eastern Canada is now 5.1% higher than a year ago.
- The quarterly change for the Western Canada total index was +1.4%. The main contributors to this increase were the machinery and motor vehicles index (1.5%), the animal production index (1.5%) and the crop production index (1.2%). Year-over-year, the Western Canada total index is up by 3.3%.
- By province, the smallest quarterly changes in the FIPI total were in the Atlantic provinces while from Quebec west, changes ranged from 0.7% for British Columbia to 2.3% for Quebec.

Data users should note that in accordance with the revision schedule for these series, some indexes for 1993 have been revised. The indexes for 1992 are now final.

## Faits saillants

### Premier trimestre de 1994

#### Indice des prix des entrées dans l'agriculture (IPEA)

L'indice des prix des entrées dans l'agriculture (IPEA, 1986=100) s'est établi au niveau préliminaire de 116,2 au premier trimestre de 1994, un gain de 1,5% par rapport au trimestre précédent et de 4,2% par rapport à l'an dernier. Parmi les neuf grands groupes de l'IPEA, sept se sont accrus au premier trimestre et deux ont chuté.

- L'indice de l'élevage d'animaux a augmenté de 2,5% au cours du trimestre, surtout en raison de la hausse des prix des aliments pour animaux (5,2%), qui a été observée dans l'est du Canada (6,0%) ainsi que dans l'ouest du pays (3,9%). L'indice de l'élevage des animaux est de 9,8% supérieur au niveau observé un an plus tôt, surtout en raison de la croissance des indices du bétail d'engraissement (10,6%) et des aliments pour animaux (9,2%).
- L'indice des machines agricoles et des véhicules automobiles a progressé de 1,6% au cours du trimestre, deux des composantes de l'indice ayant affiché des gains. La variation la plus élevée a été observée au titre de l'indice de remplacement des machines (3,5%), les machines automotrices et les machines tractées ayant augmenté de 3,8% et de 2,6% respectivement. D'une année à l'autre, l'indice des machines agricoles et des véhicules automobiles s'est accru de 3,3%, l'indice de remplacement des machines (6,0%) ayant le plus contribué à la croissance.
- L'indice des cultures agricoles s'est accru de 1,2%, surtout en raison de la hausse des prix des grains et des oléagineux (5,2%) et des légumineuses et graminées (5,4%). L'ouest du Canada a enregistré la plus forte croissance au titre des grains et des oléagineux, qui ont progressé de 9,1%, et des légumineuses et graminées, qui ont augmenté de 6,9%. L'indice des cultures agricoles s'est accru 5,0% par rapport à l'an dernier, surtout en raison de la hausse des prix des légumineuses et des graminées (13,2%).
- L'indice des intérêts a eu un effet compensateur sur la variation trimestrielle globale. Il a chuté de 1,0%, l'indice de la composante hypothécaire ayant régressé de 0,5% et celui de la composante non hypothécaire, ayant chuté de 2,4%. L'indice des intérêts était de 10,1% inférieur au niveau observé au premier trimestre de 1993.
- L'indice d'ensemble pour l'est du Canada s'est accru de 1,5% au cours du trimestre. La variation était semblable à celle observée à l'échelle nationale. Les plus fortes hausses ont été enregistrées au titre de l'indice de l'élevage d'animaux (3,2%), les prix des porcelets sevrés et des aliments pour animaux ayant augmenté de 6,9% et de 6,0% respectivement. L'indice d'ensemble pour l'est du Canada se situe maintenant à 5,1% de plus qu'il y a un an.
- L'indice d'ensemble pour l'ouest du Canada a grimpé de 1,4% par rapport au quatrième trimestre de 1993. Ce sont les indices des machines et des véhicules automobiles (1,5%), de l'élevage d'animaux (1,5%) et des cultures agricoles (1,2%) qui ont le plus contribué à la croissance. D'une année à l'autre, l'indice d'ensemble pour l'ouest du Canada s'est accru de 3,3%.
- À l'échelle provinciale, les plus petits changements trimestriels ont été affichés par les provinces de l'Atlantique, alors que les variations pour les autres régions à l'ouest, ont varié de 0,7% pour la Colombie Britannique à 2,3% pour le Québec.

Les utilisateurs des données doivent prendre note que certains indices pour 1993 ont été révisés conformément au calendrier de révision pour ces séries. Les indices pour 1992 sont maintenant définitifs.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. d'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years. (2) Selected items. (3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II. (4) In cases where a commodity has two D numbers, the top number is the old D number which is terminated as of first quarter 1994, and the bottom number is the newly assigned number to be used from now on.

## TECHNICAL NOTES

### FARM INPUT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939 = 100 for the years 1913 to 1971.

#### Index formula

A general formula for an index made up of several items for the current period ( $I_{t/0}$ ) is:

$$I_{t/0} = \frac{\sum P_t Q_0}{\sum P_0 Q_0} \times 100$$

## NOTES TECHNIQUES

### INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986 = 100)

#### 1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939 = 100, pour les années 1913 à 1971.

#### Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ( $I_{t/0}$ ) est la suivante:

where  $p_t$  is the price of an item in the current period, and  $p_o$ ,  $q_o$  and  $p_o q_o$  are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

$$I_{t/o} = \sum (p_t / p_o) w$$

where

où

$$W = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item - its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article - soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

### Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

### Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

### Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

### Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

### Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

### Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue No. 11-001) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

### Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

### Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

### Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001 au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

### Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

### For further information

For data only, please contact the information unit at 613-951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at 613-951-3342. The addresses are on the inside front cover of this book.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

### Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613-951-3350) ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au 613-951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

(1) As of August 1992, current initial prices are used for wheat and barley in Western Canada.

(1) À partir du mois d'août 1992, les prix initiaux courants sont utilisés pour le blé et l'orge de l'ouest canadien.

## TECHNICAL NOTES

### FARM PRODUCT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

##### Definition and Coverage

The Farm Product Price Index (FPPI), formerly called Index Numbers of Farm Prices of Agricultural Products, measures the change through time in the prices received for agricultural commodities at the first transaction point.

The commodities included in the index are, for the most part, the same commodities that are estimated in the farm cash receipts series published in Agriculture Economic Statistics, Catalogue 21-603. From 1957 to date, the index is based upon products which account for about 95% of total farm cash receipts from farming operations for both the 1960-62 and 1971 weight base period. For years prior to 1957, the index was based upon products which accounted for about 90% of total cash receipts.

Users should note that Newfoundland was not included in the index prior to 1981. As a result, a break in the Canada series occurs in 1981. Nevertheless, Newfoundland's agricultural production is relatively small and the break is not significant.

##### Data Description and Sources

Much of the price information used in compiling the index is obtained from a monthly survey of farm respondents throughout Canada. Where possible, administrative data are used as price sources in order to reduce response burden. The prices used in computing the index are, as closely as can be determined, the transaction prices received by farmers when ownership first changes hands. These prices include any bonuses and premiums which can be attributed to specific commodities, but they exclude any storage, transportation, processing and handling charges which are deducted before the farmer is paid.

In reporting prices each month, survey respondents are asked to report the average prices prevailing in their neighbourhood, taking into account the various grades of each commodity marketed. Thus, average prices reported by these respondents may differ from month to month as a result of changes in price, changes in quality, or a combination of both. In effect, this index is not a measure of pure price change but a measure of the change in the return to farmers per unit of product marketed.

No adjustment for seasonal variation of prices has been made in the index. Also, the series is subject to revision as more complete and up-to-date data become available. This accounts for any changes between the indexes published in earlier reports and those appearing in the current publication.

## NOTES TECHNIQUES

### INDICE DES PRIX DES PRODUITS AGRICOLES (1986 = 100)

#### 1. Concepts, description des données et méthodes

##### Définition et champ d'observation

L'indice des prix des produits agricoles (IPPA), qui était auparavant appelé les nombres-indices des prix à la ferme des produits agricoles, mesure la variation des prix reçus pour les produits agricoles au premier point de transaction.

Les produits figurant dans l'indice sont, à quelques exceptions près, les mêmes que ceux qui figurent dans la série sur les recettes monétaires agricoles publiée dans le bulletin Statistique économiques agricoles, n° 21-603 au catalogue. Pour la période de 1957 à date, l'indice est basé sur les produits qui représentent environ 95% des recettes globales en espèces touchées au cours de la période de base pondérée 1960-62 et 1971. Avant 1957 inclusivement, l'indice était basé sur les prix des produits représentant environ 90% des recettes globales en espèces des cultivateurs.

Comme les chiffres de Terre-Neuve ont été pris en compte dans l'indice en 1981, il se produit une solution de continuité dans la série du Canada à ce moment-là. Cependant, comme la production agricole de cette province n'est pas considérable, cette solution de continuité n'est pas importante.

##### Description et sources des données

La plupart des renseignements sur les prix utilisés pour la confection de l'indice proviennent des rapports mensuels produits par des correspondants agricoles dans tout le Canada. Les prix utilisés pour calculer l'indice se rapprochent, dans la mesure du possible, des prix obtenus par les agriculteurs au moment de la transaction, lorsque le titre de propriété change de mains pour la première fois. Ces prix comprennent les suppléments et les primes qu'il est possible de rattacher à des produits particuliers, mais non les frais d'entreposage, de transport, de traitement et de manutention qui sont défactués avant que l'agriculteur ne soit payé.

Au moment du rapport mensuel sur les prix, on demande aux correspondants d'indiquer la moyenne des prix en vigueur dans leur voisinage, en tenant compte des diverses qualités de chacun des produits sur le marché. Ainsi, les prix moyens déclarés par ces correspondants peuvent varier d'un mois à l'autre en raison des modifications de prix, des variations de la qualité offerte, ou d'une combinaison de ces deux éléments. En réalité, cet indice ne constitue pas une mesure de la simple variation de prix mais une mesure des variations des recettes des cultivateurs par unité de produit mis en vente.

Aucune rectification de prix n'a été faite pour tenir compte des variations saisonnières. Les séries peuvent subir des modifications à mesure que des données plus détaillées et plus à jour nous parviennent. Ces modifications expliquent les variations existant entre les indices publiés dans les bulletins précédents et les indices figurant dans le présent bulletin.

## Weights and Linking

As of March 1990, the index was rebased to 1986=100. The weighting period of 1981-1984 has been maintained, and the commodities included in the index remain unchanged from those included in the 1981=100 index.

When the index was rebased to 1981=100 in December 1986, certain new commodities were added and several old commodities were disaggregated so that more narrowly defined price movements could be followed. Also, with this rebasing, Newfoundland was included in the index beginning in January 1981.

The present index has four weighting periods for approximately 40 years of data. The index has been completely rebased in terms of time, weight, and coverage about every ten years. This ensures that the quantity weights reflect current production patterns. The multi-year weighting period used in the current index provides more representative weights than a single year weighting period. As noted above, the most recent rebasing was in terms of base time period only, as the weighting period and coverage are considered to still be representative of current production patterns.

This index was first published in August 1946 with a time and weight base of 1935-1939=100. In September 1969, the weight base was changed to 1960-1962=100 and the time base to 1961=100. In August 1978, the index was rebased with the time and weight base for the index of 1971=100. In December 1986, the index was rebased with a time base of 1981=100, and a weight base of 1981-1984. In March 1990, the index was again rebased with a time base of 1986=100, and the weight base was unchanged at 1981-1984=100. In each case, a Laspeyres' type (base-weighted) formula was used in calculating the index. Thus, The index expresses current farm prices as a percentage of prices prevailing in the base period.

To provide a measure of continuity, an annual series of linked index numbers on a 1986=100 base is available from 1950 to date. The monthly index has been recalculated using a 1986 time base as far back as January 1981. Annual indexes from 1950 to 1980 are linked to the current time base at January 1981.

## Data Availability

Data in this publication are also available on CANSIM Matrix 176. Additional indexes and weighting diagrams are available by contacting the Farm Income and Prices Section, as are the prices used in the calculation of the index.

## Pondérations et enchaînement

Depuis mars 1990, la base de l'indice a changé et est maintenant 1986=100. La période de pondération de 1981 à 1984 a été maintenue et les produits compris dans l'indice demeurent les mêmes que ceux de l'indice 1981=100.

Lorsque la base de l'indice est passé à 1981=100 en décembre 1986, quelques nouveaux produits ont été ajoutés et un certain nombre d'anciens produits ont été désagrégés pour permettre de suivre de façon plus précise la variation des prix. De plus, ce changement de base a permis d'inclure Terre-Neuve à partir de janvier 1981.

Le présent indice a quatre périodes de pondération et des données s'échelonnant sur 40 ans. Un changement complet de la base de l'indice (période, pondération et champ) a été effectué tous les 10 ans. Les coefficients de pondération des quantités reflètent bien ainsi les tendances de la production. La période de pondération comptant plusieurs années qui est utilisée pour l'indice actuel donne des coefficients de pondération plus représentatifs qu'une période de pondération ne comptant qu'une seule année. Comme il a été indiqué ci-dessus, le changement de base le plus récent concerne la période de base seulement car il est considéré que la période de pondération et le champ demeurent représentatifs des tendances actuelles de production.

L'indice a été publié pour la première fois en août 1946 sur la base temporelle et pondérée de 1935-1939=100. En septembre 1969, une nouvelle base pondérée a été établie, 1960-1962=100, la base temporelle étant 1961=100. En août 1978, la base de l'indice a été changée, la base temporelle et la base pondérée étant fixées à 1971=100. En décembre 1986, la base temporelle devient 1981=100 et la base pondérée 1981-1984. En mars 1990, la base de l'indice est changée, la base temporelle devenant 1986=100 et la base pondérée demeurant inchangée à 1981-1984=100. Dans chaque cas, la formule de Laspeyre a été utilisée pour le calcul de l'indice. L'indice ainsi produit représente les prix agricoles en cours, en termes de pourcentage des prix en vigueur pendant la période de référence.

Pour assurer une certaine continuité, une série annuelle d'indices raccordés à la base de 1986=100 est disponible pour la période allant de 1950 à ce jour. L'indice mensuel a été calculé de nouveau sur la base de 1986 jusqu'en janvier 1981. Les indices annuels de 1950 à 1980 sont raccordés à la base temporelle actuelle de janvier 1981.

## Données disponibles

Les données de la présente publication sont aussi disponibles sur CANSIM dans la matrice 176. Les indices additionnels, les diagrammes de pondération et les prix utilisés dans le calcul de l'indice sont disponibles en s'adressant à la Section du revenu agricole et des prix à la production.

## MERCI DE VOTRE COMMANDE!

Statistics  
Canada

# Canada

# CANADA A PORTRAIT

A CELEBRATION  
OF OUR GREAT NATION

# UN PORTRAIT DU CANADA

POUR CÉLÉBRER LA  
GRANDEUR DE NOTRE PAYS

Canada challenges the imagination. Imagine a country where Newfoundlanders live closer to Africans than they do to fellow Canadians in British Columbia. Or a country with an island that has a glacier bigger than Ireland. Imagine a country with two million lakes, and the world's longest coastline – but that shares a border with only one nation.

Statistics Canada has created the 54th edition of **Canada: A Portrait** as a celebration of our great nation. Drawn from Statistics Canada's rich palette of national data, it paints a picture of where we are socially, economically, culturally and politically.

Over 60 unique and beautiful photographs combined with lively text, provide a close-up look at the Canada of today.

Experience this land's remarkable natural regions and diverse human landscape through six chapters entitled: **This Land, The People, The Society, Arts and Leisure, The Economy, and Canada in the World.**

Eminent Canadians such as astronaut Roberta Bondar, former hockey star Jean Béliveau, and writer W.O. Mitchell have contributed their personal visions of Canada.

**Canada: A Portrait** is a beautiful illustration of the Canada of today.

Presented in a 30 cm X 23 cm (12 1/4" X 9") format, prestige hardcover, with over 200 pages, **Canada: A Portrait** (Catalogue No. 11-403E) is available in Canada for \$38.00 plus GST, US \$41.95 in the United States, and US \$48.95 in other countries.

To order write **Statistics Canada, Publications Sales, Ottawa, Ontario, K1A 0T6** or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. For faster ordering call toll-free **1-800-267-6677** and use your VISA and MasterCard or fax your order to **(613) 951-1584**.

Le Canada est un pays qui défie l'imagination. Imaginez un pays où les Terre-Neuviens vivent plus près des Africains que de leurs compatriotes de la Colombie-Britannique. Un pays où se trouve une île sur laquelle s'étend un glacier plus grand que l'Irlande. Imaginez un pays qui compte 2 millions de lacs et le plus long littoral du monde, et pourtant un seul voisin.

Statistique Canada a créé la 54<sup>e</sup> édition d'**Un portrait du Canada** pour célébrer la grandeur de notre pays. C'est à partir du riche éventail de données nationales de Statistique Canada que l'on a brossé ce tableau de notre situation sociale, économique, culturelle et politique.

Plus de 60 magnifiques photos, mariées à un texte vivant, offrent une vision claire et détaillée de ce qu'est le Canada d'aujourd'hui.

Découvrez les splendides régions naturelles de ce pays, de même que son paysage humain des plus diversifiés, à travers six chapitres intitulés : **Le territoire, La population, La société, Les arts et les loisirs, L'économie et Le Canada dans le monde.**

D'éminents Canadiens, tels Roberta Bondar, astronaute, Jean Béliveau, ancienne vedette de hockey, et W.O. Mitchell, écrivain, y font part de leur vision personnelle du Canada.

**Un portrait du Canada...** un magnifique ouvrage de collection qui décrit admirablement bien le Canada d'aujourd'hui.

Présenté dans un format de 30 cm sur 23 cm (12,25 po X 9 po), dans une couverture rigide de luxe et en plus de 200 pages, **Un portrait du Canada** (N° 11-403F au catalogue) coûte 38 \$ plus TPS au Canada, 41,95 \$ US aux États-Unis et 48,95 \$ US dans les autres pays.

Pour commander, écrivez à **Statistique Canada, Vente des publications, Ottawa (Ontario), K1A 0T6** ou communiquez avec le Centre régional de consultation de Statistique Canada le plus proche. La liste figure dans la publication. Pour commander plus rapidement, composez sans frais le **1-800-267-6677** et utilisez votre carte VISA ou MasterCard ou télécopiez votre commande au **(613) 951-1584**.

# THE 1994 CANADA YEAR BOOK

*Your indispensable and comprehensive reference source on Canada*

For essential information on Canada, turn to the *Canada Year Book*. An invaluable resource, the 1994 edition is beautifully designed in an inviting and easy-to-read format.

The 1994 *Canada Year Book* examines recent events, changes and trends in great detail. Organized carefully into 22 chapters, it answers questions on virtually every topic from geography through health to banking.

## This edition features:

▶ Over 700 crisply written pages packed with eye-opening information on life in Canada — from social, economic, cultural and demographic perspectives

▶ 250 concise tables plus 63 charts and graphs that put statistical information into focus

▶ Stunning photographs capturing distinctively Canadian scenes by some of this country's finest photographers

▶ Fascinating short feature articles covering everything from archaeology to white collar trends

Trusted for over 125 years by students, teachers, researchers, librarians and business people, the *Canada Year Book* is the reference source to consult first on all aspects of Canada.

An enduring addition to any home or office library!

## ORDER YOUR COPY OF CANADA YEAR BOOK TODAY.

Available in separate English and French editions, the 1994 *Canada Year Book* (Catalogue No. 11-402E) is \$59.95 plus \$5.05 shipping and handling in Canada, US \$72 in the United States, and US \$84 in other countries.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, Ottawa, Ontario K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and charge it to your VISA or MasterCard.

# L'ANNUAIRE DU CANADA 1994

*Un ouvrage complet et indispensable sur le Canada*

Pour obtenir des renseignements essentiels sur le Canada, consultez *l'Annuaire du Canada*. Inestimable source d'information, l'édition de 1994 est un ouvrage d'une présentation très soignée, attrayant et facile à lire.

*L'Annuaire du Canada 1994* étudie en profondeur les événements, les tendances et les changements récents. Divisé en 22 chapitres, il répond à vos questions sur presque tous les sujets, depuis la géographie jusqu'à la santé et la banque.

## Voici ce que vous trouverez dans l'édition de 1994 :

▶ Plus de 700 pages écrites dans un style vif et pleines de renseignements intéressants sur les dimensions sociales, économiques, culturelles et démographiques de la vie canadienne

▶ 250 tableaux concis et 63 graphiques et diagrammes qui permettent de mettre en perspective l'information statistique

▶ Remarquables photographies de paysages typiquement canadiens par certains des photographes canadiens les plus illustres

▶ Courts articles fascinants sur des sujets divers, depuis l'archéologie jusqu'à l'évolution de la situation des cols blancs

Ouvrage de référence de prédilection des étudiants, des enseignants, des chercheurs, des bibliothécaires et des gens d'affaires, et ce depuis plus de 125 ans, *l'Annuaire du Canada* est celui qu'il faut consulter en premier pour en savoir plus long sur tous les aspects du Canada.

Un volume que vous voudrez conserver longtemps dans votre bibliothèque ou au bureau!

## COMMANDEZ DÈS AUJOURD'HUI VOTRE EXEMPLAIRE DE L'ANNUAIRE DU CANADA

**Vous pouvez vous procurer** la version française ou anglaise de *l'Annuaire du Canada 1994* (no 11-402F au catalogue) au coût de 59,95 \$ (supplément de 5,05 \$ pour les frais d'expédition et de manutention) au Canada, 72 \$ US aux États-Unis et 84 \$ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division du marketing, Vente et service, Ottawa (Ontario) K1A 0T6, ou communiquez avec le centre de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous le préférez, télécopiez votre commande en signalant le 1-613-951-1584 ou téléphonez sans frais au 1-800-267-6677 et portez les frais à votre compte VISA ou MasterCard.

## Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordnolinguée et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Section des industries de biens et de services,  
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 téléphone: (1-819-951-9606) ou au centre de consultation de Statistique Canada à:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)

## Note of Appreciation

*Canada owes the success of its statistical system to  
a long-standing cooperation involving Statistics  
Canada, the citizens of Canada, its businesses,  
governments and other institutions. Accurate and  
timely statistical information could not be produced  
without their continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose  
sur un partenariat bien établi entre Statistique Canada  
et la population, les entreprises, les administrations  
canadiennes et les autres organismes. Sans cette  
collaboration et cette bonne volonté, il serait impossible  
de produire des statistiques précises et actuelles.*

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- <sup>P</sup> preliminary figures.
- <sup>r</sup> revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613)951-8200.

® Registered Trade Mark of Statistics Canada.

### Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Robin Lowe**, Chief, Goods & Services Producing Industries Section.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- <sup>P</sup> nombres provisoires.
- <sup>r</sup> nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6, ou téléphonez à (613)951-8200.

® Marque déposée de Statistique Canada.

### Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Robin Lowe**, Chef, Section des Industries de biens et de services.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48 - 1984.

## Highlights

### Second quarter of 1994

#### Farm Input Price Index (FIPI)

In the second quarter of 1994, farmers saw the prices of their inputs rise 2.2%, half of the total increase since the second quarter of 1993. Western Canadians saw a more rapid increase as fertilizer prices there jumped 15%.

Farm input prices rose generally in the second quarter, as five of the seven major groups of inputs showed price increases. The most important price increases came in the areas of crop production, animal production, and interest. While crop production costs were rising faster in Western Canada, animal production and interest costs were rising faster in the East. In the second quarter, provincial increases in farm input prices ranged from 3.2% for Alberta to 1.4% in Prince Edward Island.

The overall increase in crop production input prices averaged 5.4% from the first quarter of 1994 and 6.9% from the second quarter of 1993. Particularly important in this group were increases in the prices of fertilizer which rose 10.5% for whole Canada and 15.0% in Western Canada. National fertilizer prices were 11.6% higher than in the second quarter of 1993.

Animal production input prices were up 2.3% over the previous quarter and 7.0% over a year previous. Noteworthy input prices increases in this area were for feeder cattle, up 4.0% (4.2% over the previous year), and weanling pigs, up 8.0% (9.0% over the previous year).

Interest costs rose for the first time since the fourth quarter of 1992, but costs were still 1.5% below their level in the second quarter of 1993. The increase in interest costs was 7.0% as non-mortgage interest costs jumped 11.0%.

In the second quarter, prices for all components of machinery and motor vehicles increased, moving up by 0.8%. The largest increase was for machinery replacement (1.2%) as prices for powered machinery rose by 1.3% and for non-powered machinery rose 1.1%. On a year-over-year basis, prices for machinery and motor vehicles were up 3.9%. The major contributor was again for machinery replacement, up 6.5%.

In Western Canada, costs in the second quarter of 1994 rose by 2.6% and were up 4.4% on a year-over-year basis. The most important increases in the quarter were for crop production, interest, and animal production. In Eastern Canada, however, costs in the quarter were up only 1.9%, but had still increased 4.4% on a year-over-year basis. Here the main contributors in the quarter were interest and animal production as production costs for feeder cattle and weanling pigs rose by 6.1% and 6.7% respectively.

## Faits saillants

### Deuxième trimestre de 1994

#### Indice des prix des entrées dans l'agriculture (IPEA)

Les agriculteurs ont vu les prix de leurs entrées augmenter de 2,2% au cours du deuxième trimestre de 1994, ce qui représente la moitié de l'augmentation totale enregistrée depuis le deuxième trimestre de 1993. Les Canadiens de l'Ouest ont connu une progression plus rapide, les prix des engrais dans cette région ayant fait un bond de 15%.

Les prix des entrées dans l'agriculture ont généralement augmenté au deuxième trimestre, cinq des sept grands groupes d'entrées étant en hausse. Les plus fortes majorations ont été observées pour les cultures agricoles, l'élevage d'animaux et l'intérêt. La progression la plus rapide a été observée pour les cultures agricoles dans l'Ouest canadien et pour l'élevage d'animaux et l'intérêt dans l'Est canadien. Par province, les augmentations des prix des entrées dans l'agriculture au deuxième trimestre sont comprises entre 1,4% à l'Île-du-Prince-Édouard et 3,2% en Alberta.

Pour les cultures agricoles dans leur ensemble, les prix des entrées ont augmenté en moyenne de 5,4% par rapport au premier trimestre de 1994 et de 6,9% par rapport au deuxième trimestre de 1993. Dans ce groupe, les prix des engrais ont connu une augmentation globale, soit de 10,5% et de 15,0% dans l'Ouest canadien. À l'échelle du Canada, les prix des engrais dépassaient de 11,6% leur niveau du deuxième trimestre de 1993.

Pour l'élevage d'animaux, les prix des entrées étaient en hausse de 2,3% par rapport au trimestre précédent et de 7,0% par rapport à un an plus tôt. Dans ce groupe, des majorations dignes de mention ont été enregistrées pour les bovins d'engraissement, en hausse de 4,0% (4,2% sur un an), et pour les porcelets en sevrage, en hausse de 8,0% (9,0% sur un an).

Les taux d'intérêt ont été relevés pour la première fois depuis le quatrième trimestre de 1992, mais restent inférieurs de 1,5% à ce qu'ils étaient au deuxième trimestre de 1993. L'augmentation des taux d'intérêt a été de 7,0%, les taux non hypothécaires ayant fait un bond de 11,0%.

Au deuxième trimestre, le groupe des machines et des véhicules automobiles a progressé de 0,8%, les hausses de prix ayant été généralisées. Le remplacement de machines est la composante qui a inscrit la plus forte augmentation (1,2%), les prix des machines automotrices ayant augmenté de 1,3% et ceux des machines tractées, de 1,1%. D'une année à l'autre, les prix des machines et des véhicules automobiles ont grimpé de 3,9%. La composante du remplacement des machines a encore été celle qui a le plus contribué à la progression, avec un gain de 6,5%.

Dans l'Ouest canadien, les coûts ont augmenté de 2,6% au deuxième trimestre de 1994 et de 4,4% par rapport à il y a un an. Les plus fortes hausses trimestrielles ont été inscrites par les cultures agricoles, l'intérêt et l'élevage d'animaux. Dans l'Est canadien, toutefois, les coûts n'ont augmenté que de 1,9% au cours du trimestre, mais de 4,4% d'une année à l'autre. Dans cette région, les principaux facteurs d'entraînement durant le trimestre ont été l'intérêt et l'élevage d'animaux, des hausses de 6,1% et de 6,7% ayant été notées pour les bovins d'engraissement et les porcelets en sevrage, respectivement.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. d'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years. (2) Selected items. (3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II. (4) In cases where a commodity has two Dnumbers, the top number is the old Dnumber which is terminated as of first quarter 1994, and the bottom number is the newly assigned number to be used from now on.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre. (2) Certains items. (3) Les groupes et sous-groupes de produits sont identifiés par le type de caractères d'imprimerie et par l'espacement. Pour plus d'explications, veuillez voir les appendices I ou II. (4) Dans les cas où un produit a deux numéros D de banque de données, le numéro du dessus est l'ancien numéro D qui a été discontinué au premier trimestre de 1994, alors que le numéro du dessous est le nouveau numéro assigné qui est utilisé à partir de maintenant.

(1) The indexes are subject to a two-stage revision. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

## TECHNICAL NOTES

### FARM INPUT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

#### Index formula

A general formula for an index made up of several items for the current period ( $I_{t/0}$ ) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

## NOTES TECHNIQUES

### INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986 = 100)

#### 1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

#### Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ( $I_{t/0}$ ) est la suivante:

where  $p_t$  is the price of an item in the current period, and  $p_o$ ,  $q_o$  and  $p_o q_o$  are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

$$I_{t/o} = \sum (p_t / p_o) w$$

où

where

$$W = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item - its percentage share in the total expenditure in the base period for all items in the index of which it is part.

### Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

### Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

où  $p_t$  est le prix de l'article au cours de la période courante,  $p_o$ ,  $q_o$  et  $p_o q_o$  représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

Exprimé de cette façon, "w" est le poids en pourcentage d'un article - soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

### Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

### Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'œuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

## Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

## Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue No. 11-001) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

## Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

## Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

## Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001 au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

## Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

### For further information

For data only, please contact the information unit at 613-951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at 613-951-3342. The addresses are on the inside front cover of this book.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

### Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613-951-3350) ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au 613-951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

(1) As of August 1992, current initial prices are used for wheat and barley in Western Canada.

(1) À partir du mois d'août 1992, les prix initiaux courants sont utilisés pour le blé et l'orge de l'ouest canadien.

## TECHNICAL NOTES

### FARM PRODUCT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

##### Definition and Coverage

The Farm Product Price Index (FPPI), formerly called Index Numbers of Farm Prices of Agricultural Products, measures the change through time in the prices received for agricultural commodities at the first transaction point.

The commodities included in the index are, for the most part, the same commodities that are estimated in the farm cash receipts series published in Agriculture Economic Statistics, Catalogue 21-603. From 1957 to date, the index is based upon products which account for about 95% of total farm cash receipts from farming operations for both the 1960-62 and 1971 weight base period. For years prior to 1957, the index was based upon products which accounted for about 90% of total cash receipts.

Users should note that Newfoundland was not included in the index prior to 1981. As a result, a break in the Canada series occurs in 1981. Nevertheless, Newfoundland's agricultural production is relatively small and the break is not significant.

##### Data Description and Sources

Much of the price information used in compiling the index is obtained from a monthly survey of farm respondents throughout Canada. Where possible, administrative data are used as price sources in order to reduce response burden. The prices used in computing the index are, as closely as can be determined, the transaction prices received by farmers when ownership first changes hands. These prices include any bonuses and premiums which can be attributed to specific commodities, but they exclude any storage, transportation, processing and handling charges which are deducted before the farmer is paid.

In reporting prices each month, survey respondents are asked to report the average prices prevailing in their neighbourhood, taking into account the various grades of each commodity marketed. Thus, average prices reported by these respondents may differ from month to month as a result of changes in price, changes in quality, or a combination of both. In effect, this index is not a measure of pure price change but a measure of the change in the return to farmers per unit of product marketed.

No adjustment for seasonal variation of prices has been made in the index. Also, the series is subject to revision as more complete and up-to-date data become available. This accounts for any changes between the indexes published in earlier reports and those appearing in the current publication.

## NOTES TECHNIQUES

### INDICE DES PRIX DES PRODUITS AGRICOLES (1986 = 100)

#### 1. Concepts, description des données et méthodes

##### Définition et champ d'observation

L'indice des prix des produits agricoles (IPPA), qui était auparavant appelé les nombres-indices des prix à la ferme des produits agricoles, mesure la variation des prix reçus pour les produits agricoles au premier point de transaction.

Les produits figurant dans l'indice sont, à quelques exceptions près, les mêmes que ceux qui figurent dans la série sur les recettes monétaires agricoles publiée dans le bulletin Statistique économiques agricoles, n° 21-603 au catalogue. Pour la période de 1957 à date, l'indice est basé sur les produits qui représentent environ 95% des recettes globales en espèces touchées au cours de la période de base pondérée 1960-62 et 1971. Avant 1957 inclusivement, l'indice était basé sur les prix des produits représentant environ 90% des recettes globales en espèces des cultivateurs.

Comme les chiffres de Terre-Neuve ont été pris en compte dans l'indice en 1981, il se produit une solution de continuité dans la série du Canada à ce moment-là. Cependant, comme la production agricole de cette province n'est pas considérable, cette solution de continuité n'est pas importante.

##### Description et sources des données

La plupart des renseignements sur les prix utilisés pour la confection de l'indice proviennent des rapports mensuels produits par des correspondants agricoles dans tout le Canada. Les prix utilisés pour calculer l'indice se rapprochent, dans la mesure du possible, des prix obtenus par les agriculteurs au moment de la transaction, lorsque le titre de propriété change de mains pour la première fois. Ces prix comprennent les suppléments et les primes qu'il est possible de rattacher à des produits particuliers, mais non les frais d'entreposage, de transport, de traitement et de manutention qui sont défactués avant que l'agriculteur ne soit payé.

Au moment du rapport mensuel sur les prix, on demande aux correspondants d'indiquer la moyenne des prix en vigueur dans leur voisinage, en tenant compte des diverses qualités de chacun des produits sur le marché. Ainsi, les prix moyens déclarés par ces correspondants peuvent varier d'un mois à l'autre en raison des modifications de prix, des variations de la qualité offerte, ou d'une combinaison de ces deux éléments. En réalité, cet indice ne constitue pas une mesure de la simple variation de prix mais une mesure des variations des recettes des cultivateurs par unité de produit mis en vente.

Aucune rectification de prix n'a été faite pour tenir compte des variations saisonnières. Les séries peuvent subir des modifications à mesure que des données plus détaillées et plus à jour nous parviennent. Ces modifications expliquent les variations existant entre les indices publiés dans les bulletins précédents et les indices figurant dans le présent bulletin.

## Weights and Linking

As of March 1990, the index was rebased to 1986=100. The weighting period of 1981-1984 has been maintained, and the commodities included in the index remain unchanged from those included in the 1981=100 index.

When the index was rebased to 1981=100 in December 1986, certain new commodities were added and several old commodities were disaggregated so that more narrowly defined price movements could be followed. Also, with this rebasing, Newfoundland was included in the index beginning in January 1981.

The present index has four weighting periods for approximately 40 years of data. The index has been completely rebased in terms of time, weight, and coverage about every ten years. This ensures that the quantity weights reflect current production patterns. The multi-year weighting period used in the current index provides more representative weights than a single year weighting period. As noted above, the most recent rebasing was in terms of base time period only, as the weighting period and coverage are considered to still be representative of current production patterns.

This index was first published in August 1946 with a time and weight base of 1935-1939=100. In September 1969, the weight base was changed to 1960-1962=100 and the time base to 1961=100. In August 1978, the index was rebased with the time and weight base for the index of 1971=100. In December 1986, the index was rebased with a time base of 1981=100, and a weight base of 1981-1984. In March 1990, the index was again rebased with a time base of 1986=100, and the weight base was unchanged at 1981-1984=100. In each case, a Laspeyres' type (base-weighted) formula was used in calculating the index. Thus, The index expresses current farm prices as a percentage of prices prevailing in the base period.

To provide a measure of continuity, an annual series of linked index numbers on a 1986=100 base is available from 1950 to date. The monthly index has been recalculated using a 1986 time base as far back as January 1981. Annual indexes from 1950 to 1980 are linked to the current time base at January 1981.

## Data Availability

Data in this publication are also available on CANSIM Matrix 176. Additional indexes and weighting diagrams are available by contacting the Farm Income and Prices Section, as are the prices used in the calculation of the index.

## Pondérations et enchaînement

Depuis mars 1990, la base de l'indice a changé et est maintenant 1986=100. La période de pondération de 1981 à 1984 a été maintenue et les produits compris dans l'indice demeurent les mêmes que ceux de l'indice 1981=100.

Lorsque la base de l'indice est passé à 1981=100 en décembre 1986, quelques nouveaux produits ont été ajoutés et un certain nombre d'anciens produits ont été désagrégés pour permettre de suivre de façon plus précise la variation des prix. De plus, ce changement de base a permis d'inclure Terre-Neuve à partir de janvier 1981.

Le présent indice a quatre périodes de pondération et des données s'échelonnant sur 40 ans. Un changement complet de la base de l'indice (période, pondération et champ) a été effectué tous les 10 ans. Les coefficients de pondération des quantités reflètent bien ainsi les tendances de la production. La période de pondération comptant plusieurs années qui est utilisée pour l'indice actuel donne des coefficients de pondération plus représentatifs qu'une période de pondération ne comptant qu'une seule année. Comme il a été indiqué ci-dessus, le changement de base le plus récent concerne la période de base seulement car il est considéré que la période de pondération et le champ demeurent représentatifs des tendances actuelles de production.

L'indice a été publié pour la première fois en août 1946 sur la base temporelle et pondérée de 1935-1939=100. En septembre 1969, une nouvelle base pondérée a été établie, 1960-1962=100, la base temporelle étant 1961=100. En août 1978, la base de l'indice a été changée, la base temporelle et la base pondérée étant fixées à 1971=100. En décembre 1986, la base temporelle devient 1981=100 et la base pondérée 1981-1984. En mars 1990, la base de l'indice est changée, la base temporelle devenant 1986=100 et la base pondérée demeurant inchangée à 1981-1984=100. Dans chaque cas, la formule de Laspeyre a été utilisée pour le calcul de l'indice. L'indice ainsi produit représente les prix agricoles en cours, en termes de pourcentage des prix en vigueur pendant la période de référence.

Pour assurer une certaine continuité, une série annuelle d'indices raccordés à la base de 1986=100 est disponible pour la période allant de 1950 à ce jour. L'indice mensuel a été calculé de nouveau sur la base de 1986 jusqu'en janvier 1981. Les indices annuels de 1950 à 1980 sont raccordés à la base temporelle actuelle de janvier 1981.

## Données disponibles

Les données de la présente publication sont aussi disponibles sur CANSIM dans la matrice 176. Les indices additionnels, les diagrammes de pondération et les prix utilisés dans le calcul de l'indice sont disponibles en s'adressant à la Section du revenu agricole et des prix à la production.

# THE 1994 CANADA YEAR BOOK

*Your indispensable and  
comprehensive reference  
source on Canada*

For essential information on Canada, turn to the *Canada Year Book*. An invaluable resource, the 1994 edition is beautifully designed in an inviting and easy-to-read format.

The 1994 *Canada Year Book* examines recent events, changes and trends in great detail. Organized carefully into 22 chapters, it answers questions on virtually every topic from geography through health to banking.

## This edition features:

- ▶ Over 700 crisply written pages packed with eye-opening information on life in Canada — from social, economic, cultural and demographic perspectives
- ▶ 250 concise tables plus 63 charts and graphs that put statistical information into focus
- ▶ Stunning photographs capturing distinctively Canadian scenes by some of this country's finest photographers
- ▶ Fascinating short feature articles covering everything from archaeology to white collar trends

Trusted for over 125 years by students, teachers, researchers, librarians and business people, the *Canada Year Book* is the reference source to consult first on all aspects of Canada.

An enduring addition to any home or office library!

## ORDER YOUR COPY OF CANADA YEAR BOOK TODAY.

Available in separate English and French editions, the 1994 *Canada Year Book* (Catalogue No. 11-402E) is \$59.95 plus \$5.05 shipping and handling in Canada, US \$72 in the United States, and US \$84 in other countries.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, Ottawa, Ontario K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and charge it to your VISA or MasterCard.

# L'ANNUAIRE DU CANADA 1994

*Un ouvrage complet et  
indispensable sur le Canada*

Pour obtenir des renseignements essentiels sur le Canada, consultez *l'Annuaire du Canada*. Inestimable source d'information, l'édition de 1994 est un ouvrage d'une présentation très soignée, attrayant et facile à lire.

*L'Annuaire du Canada 1994* étudie en profondeur les événements, les tendances et les changements récents. Divisé en 22 chapitres, il répond à vos questions sur presque tous les sujets, depuis la géographie jusqu'à la santé et la banque.

## Voici ce que vous trouverez dans l'édition de 1994 :

- ▶ Plus de 700 pages écrites dans un style vif et pleines de renseignements intéressants sur les dimensions sociales, économiques, culturelles et démographiques de la vie canadienne
- ▶ 250 tableaux concis et 63 graphiques et diagrammes qui permettent de mettre en perspective l'information statistique
- ▶ Remarquables photographies de paysages typiquement canadiens par certains des photographes canadiens les plus illustres
- ▶ Courts articles fascinants sur des sujets divers, depuis l'archéologie jusqu'à l'évolution de la situation des cols blancs

Ouvrage de référence de prédilection des étudiants, des enseignants, des chercheurs, des bibliothécaires et des gens d'affaires, et ce depuis plus de 125 ans, *l'Annuaire du Canada* est celui qu'il faut consulter en premier pour en savoir plus long sur tous les aspects du Canada.

Un volume que vous voudrez conserver longtemps dans votre bibliothèque ou au bureau!

## COMMANDEZ DÈS AUJOURD'HUI VOTRE EXEMPLAIRE DE L'ANNUAIRE DU CANADA

Vous pouvez vous procurer la version française ou anglaise de *l'Annuaire du Canada 1994* (no 11-402F au catalogue) au coût de 59,95 \$ (supplément de 5,05 \$ pour les frais d'expédition et de manutention) au Canada, 72 \$ US aux États-Unis et 84 \$ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division du marketing, Vente et service, Ottawa (Ontario) K1A 0T6, ou communiquez avec le centre de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous le préférez, télécopiez votre commande en signalant le 1-613-951-1584 ou téléphonez sans frais au 1-800-267-6677 et portez les frais à votre compte VISA ou MasterCard.

# THE MARKET RESEARCH HANDBOOK 1993/1994

**1991 CENSUS INCLUDED**

*The fastest way to get  
off to a good start !*

Brainstorming with your colleagues produces some great marketing ideas. But which ones will you use? The **Market Research Handbook** can help you narrow your options before you commit any more time and resources to developing your strategy.

This handbook is the most comprehensive statistical compendium on Canadian consumers and the businesses that serve them. It helps you to identify, define and locate your target markets.

## Looking for...

... socio-economic and demographic profiles of 45 urban areas?

... revenue and expenditure data for retailers and small businesses?

The **Market Research Handbook** has it all... and more. It provides information on:

- 1991 Census information
- personal expenditures on goods and services
- size and composition of households and families
- wages, salaries and employment
- investment in Canadian industries
- labour force in various industries
- industry and consumer prices

It has been one of our bestsellers since 1977 for the simple reason that it offers such a range and depth of market data. Save time and money when you're looking for data or data sources, keep the **Market Research Handbook** close at hand for easy reference.

The **Market Research Handbook** (Cat. no. 63-224) is \$94 (plus 7% GST) in Canada, US\$113 in the United States and US\$132 in other countries.

To order, write to Statistics Canada, Marketing Division, Publication Sales, Ottawa, Ontario, K1A 0T6 or contact the nearest statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to (613) 951-1584. Or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

# LE RECUEIL STATISTIQUE DES ÉTUDES DE MARCHÉ 1993/1994

**RECENSEMENT DE 1991**

*Pour partir du bon pied !*

Des séances de remue-ménings jaillissent d'excellentes idées de commercialisation. Mais lesquelles choisir ? Le **Recueil statistique des études de marché** peut vous faciliter les choix avant que vous n'engagiez plus de temps et de ressources à l'élaboration de votre stratégie.

Ce recueil statistique est le plus exhaustif qui soit sur les consommateurs canadiens et les entreprises qui les servent. Il vous aide à définir et situer vos marchés cibles.

## Vous cherchez...

... des profils socio-économiques et démographiques de 45 régions urbaines ?

... des données sur les recettes et les dépenses de détaillants et de petites entreprises ?

Le **Recueil** contient tout cela... et plus encore :

- données sur le recensement de 1991
- dépenses personnelles en biens et en services
- taille et composition des ménages et des familles
- traitements, salaires et emploi
- investissements par secteur d'activité économique
- population active par secteur d'activité
- prix de l'industrie et de la consommation

Si c'est l'un de nos succès depuis 1977, c'est parce qu'il vous renseigne en long et en large sur le marché. Pour économiser temps et argent, vous ne sauriez vous en passer.

Le **Recueil statistique des études de marché** (n° 63-224 au catalogue) coûte 94 \$ (plus 7% de TPS) au Canada, 113 \$ US aux États-Unis et 132 \$ US dans les autres pays.

Pour commander, veuillez écrire à Statistique Canada, Division du marketing, Vente des publications, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre de consultation de Statistique Canada le plus proche (voir la liste figurant dans la présente publication).

Vous pouvez également commander par télécopieur au (613) 951-1584 ou composer sans frais le 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

## Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinaire et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Section des industries de biens et de services,  
Division des prix,

## Note of Appreciation

*Canada owes the success of its statistical system to  
a long-standing cooperation involving Statistics  
Canada, the citizens of Canada, its businesses,  
governments and other institutions. Accurate and  
timely statistical information could not be produced  
without their continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose  
sur un partenariat bien établi entre Statistique Canada  
et la population, les entreprises, les administrations  
canadiennes et les autres organismes. Sans cette  
collaboration et cette bonne volonté, il serait impossible  
de produire des statistiques précises et actuelles.*

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- <sup>P</sup> preliminary figures.
- <sup>r</sup> revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613)951-8200.

® Registered Trade Mark of Statistics Canada.

### Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division.
- **François Bordé**, Chief, Goods & Services Producing Industries Section.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- <sup>P</sup> nombres provisoires.
- <sup>r</sup> nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6, ou téléphonez à (613)951-8200.

® Marque déposée de Statistique Canada.

### Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix.
- **François Bordé**, Chef, Section des Industries de biens et de services.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'American National Standard for Information Sciences - "Permanence of Paper for Printed Library Materials", ANSI Z39.48 - 1984.

Highlights

Third Quarter of 1994

Farm Input Price Index (FIPI)

In the third quarter of 1994, Canadian farmers as a whole experienced no change in the overall prices of their inputs from the second quarter of 1994. Regional price changes offset each other: Eastern farmers saw prices for their inputs decrease 0.9% during the quarter, while Western farmers saw prices increase 1.0%.

Prices rose during the quarter for most input groups. Six of the seven major groups showed slight price increases. In both Eastern and Western Canada, the most important increases during the quarter were for machinery and motor vehicles, supplies and services, and interest. At the same time, decreases in the Animal Production index had a greater impact on the Eastern total than on the Western total. Among the provinces, changes in farm input prices ranged from -1.5% in Ontario to 1.4% in Manitoba and Saskatchewan.

The overall increase in machinery and motor vehicle input prices averaged 2.4% from the second quarter of 1994 and 6.2% from a year ago. Particularly important in the quarterly change were higher prices for petroleum products, which rose by 7.0% in Canada as a whole, by 5.5% in Eastern Canada, and by 7.4% in Western Canada. Nationally, prices of petroleum products were 6.9% higher than in the third quarter of 1993.

Input prices for supplies and services were up 1.2% from the previous quarter for Canada and were up 4.5% from the previous year. Noteworthy in this category was a 3.4% increase in the price of heating fuel from the previous quarter (+ 6.1% from the previous year).

Interest costs in Canada were estimated to be up 6.2% from the previous quarter (+8.1% from the previous year). The non-mortgage interest index rose by 8.8% during the quarter and by 14.5% since the third quarter of 1993.

Offsetting the price increases of these categories during the quarter was a large decrease in animal production input prices (-4.0%). Particularly important were large decreases in the prices for weanling pigs (-16.3%) and cattle (-3.6%). These price decreases had a greater effect during the quarter on the animal production index for Eastern Canada (-5.4%) than for Western Canada (-1.9%).

Overall, in Western Canada, prices were up 1.0% in the quarter and 4.8% from a year ago; in Eastern Canada, the figures were -0.9% and 3.2% respectively.

Faits saillants

Troisième trimestre de 1994

Indice des prix des entrées dans l'agriculture (IPEA)

Durant le troisième trimestre de 1994, les agriculteurs canadiens pris dans leur ensemble n'ont connu, par rapport au deuxième trimestre de 1994, aucun changement dans les prix demandés pour leurs entrées. Les variations de prix à l'échelle régionale se sont annulées les unes par rapport aux autres. Les fermiers de l'Est ont vu les prix de leurs entrées diminuer de 0,9% durant le trimestre, tandis que les fermiers de l'Ouest ont connu une augmentation de 1,0%.

La plupart des grands groupes d'entrées ont accusé des hausses de prix durant le trimestre, six des sept grands groupes soumis aux variations trimestrielles ont affiché de légères augmentations de prix. Tant dans l'Est que dans l'Ouest du Canada, les augmentations trimestrielles les plus importantes ont touché les machines et véhicules automobiles, les fournitures et services, de même que les intérêts. Par ailleurs, les baisses de l'indice pour l'élevage d'animaux ont eu une plus grande incidence dans l'Est que dans l'Ouest du pays. Parmi les provinces, les changements dans les prix des entrées dans l'agriculture ont varié de -1,5% en Ontario à +1,4% au Manitoba et en Saskatchewan.

L'augmentation globale de l'indice pour les machines et véhicules automobiles a atteint en moyenne 2,4% par rapport au deuxième trimestre de 1994, et 6,2% par rapport l'an dernier. La variation de l'indice au cours du trimestre a été causée particulièrement par la hausse des prix des produits pétroliers, qui ont grimpé de 7,0% dans l'ensemble du Canada, de 5,5% dans l'Est du Canada, et de 7,4% dans l'Ouest du pays. A l'échelle nationale, les prix des produits pétroliers sont supérieurs de 6,9% à ceux enregistrés durant le troisième trimestre de 1993.

Les prix des entrées pour les fournitures et services au Canada ont progressé de 1,2% par rapport au trimestre précédent, et de 4,5% par rapport à l'année précédente. Il faut noter dans cette catégorie l'augmentation de 3,4% du prix du mazout pour le chauffage par rapport au trimestre précédent (+ 6,1% par rapport à l'année précédente).

On a estimé que les frais d'intérêts au Canada étaient supérieurs de 6,2% à ceux du trimestre précédent (+8,1% par rapport à l'année précédente). L'indice pour la composante non hypothécaire a grimpé de 8,8% durant le trimestre, et de 14,5% depuis le troisième trimestre de 1993.

Une diminution importante de l'indice pour l'élevage d'animaux (- 4,0%) a compensé les hausses de prix enregistrées dans les catégories précédentes au cours du trimestre. Les baisses marquées des prix des porcelets sevrés (-16,3%) et des bovins (-3,6%) ont contribué d'une manière particulière à la diminution de l'indice. Ces reculs ont eu un effet plus important dans l'Est du Canada, où l'indice pour l'élevage d'animaux a diminué de 5,4%, que dans l'Ouest du pays, où il n'a baissé que de 1,9%.

Dans l'ouest du Canada, les prix ont augmenté de 1,0% au cours du trimestre et de 4,8% par rapport à l'an passé. Dans l'est du Canada, les prix ont chuté de 0,9% durant le trimestre, mais ils sont demeurés supérieurs de 3,2% à ceux de l'année précédente.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. d'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years. (2) Selected items. (3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II. (4) In cases where a commodity has two D numbers, the top number is the old D number which is terminated as of first quarter 1994, and the bottom number is the newly assigned number to be used from now on.

(1) The indexes are subject to a two-stage revision. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

## TECHNICAL NOTES

### FARM INPUT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939 = 100 for the years 1913 to 1971.

#### Index formula

A general formula for an index made up of several items for the current period ( $I_{t/0}$ ) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

## NOTES TECHNIQUES

### INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986 = 100)

#### 1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981 = 100 pour la période allant de 1981 à 1985, sur la base 1971 = 100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961 = 100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939 = 100, pour les années 1913 à 1971.

#### Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ( $I_{t/0}$ ) est la suivante:

where  $p_t$  is the price of an item in the current period, and  $p_o$ ,  $q_o$  and  $p_o q_o$  are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

$$I_{t/o} = \sum (p_t / p_o) w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item - its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article - soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

### Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

### Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

### Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

### Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

### Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

### Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue No. 11-001) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

### Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

### Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

### Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001 au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

### Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

### For further information

For data only, please contact the information unit at 613-951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at 613-951-3342. The addresses are on the inside front cover of this book.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

### Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613-951-3350) ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au 613-951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

(1) As of August 1992, current initial prices are used for wheat and barley in Western Canada.

(1) À partir du mois d'août 1992, les prix initiaux courants sont utilisés pour le blé et l'orge de l'ouest canadien.

## TECHNICAL NOTES

### FARM PRODUCT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

##### Definition and Coverage

The Farm Product Price Index (FPPI), formerly called Index Numbers of Farm Prices of Agricultural Products, measures the change through time in the prices received for agricultural commodities at the first transaction point.

The commodities included in the index are, for the most part, the same commodities that are estimated in the farm cash receipts series published in Agriculture Economic Statistics, Catalogue 21-603. From 1957 to date, the index is based upon products which account for about 95% of total farm cash receipts from farming operations for both the 1960-62 and 1971 weight base period. For years prior to 1957, the index was based upon products which accounted for about 90% of total cash receipts.

Users should note that Newfoundland was not included in the index prior to 1981. As a result, a break in the Canada series occurs in 1981. Nevertheless, Newfoundland's agricultural production is relatively small and the break is not significant.

##### Data Description and Sources

Much of the price information used in compiling the index is obtained from a monthly survey of farm respondents throughout Canada. Where possible, administrative data are used as price sources in order to reduce response burden. The prices used in computing the index are, as closely as can be determined, the transaction prices received by farmers when ownership first changes hands. These prices include any bonuses and premiums which can be attributed to specific commodities, but they exclude any storage, transportation, processing and handling charges which are deducted before the farmer is paid.

In reporting prices each month, survey respondents are asked to report the average prices prevailing in their neighbourhood, taking into account the various grades of each commodity marketed. Thus, average prices reported by these respondents may differ from month to month as a result of changes in price, changes in quality, or a combination of both. In effect, this index is not a measure of pure price change but a measure of the change in the return to farmers per unit of product marketed.

No adjustment for seasonal variation of prices has been made in the index. Also, the series is subject to revision as more complete and up-to-date data become available. This accounts for any changes between the indexes published in earlier reports and those appearing in the current publication.

## NOTES TECHNIQUES

### INDICE DES PRIX DES PRODUITS AGRICOLES (1986 = 100)

#### 1. Concepts, description des données et méthodes

##### Définition et champ d'observation

L'indice des prix des produits agricoles (IPPA), qui était auparavant appelé les nombres-indices des prix à la ferme des produits agricoles, mesure la variation des prix reçus pour les produits agricoles au premier point de transaction.

Les produits figurant dans l'indice sont, à quelques exceptions près, les mêmes que ceux qui figurent dans la série sur les recettes monétaires agricoles publiée dans le bulletin Statistique économiques agricoles, n° 21-603 au catalogue. Pour la période de 1957 à date, l'indice est basé sur les produits qui représentent environ 95% des recettes globales en espèces touchées au cours de la période de base pondérée 1960-62 et 1971. Avant 1957 inclusivement, l'indice était basé sur les prix des produits représentant environ 90% des recettes globales en espèces des cultivateurs.

Comme les chiffres de Terre-Neuve ont été pris en compte dans l'indice en 1981, il se produit une solution de continuité dans la série du Canada à ce moment-là. Cependant, comme la production agricole de cette province n'est pas considérable, cette solution de continuité n'est pas importante.

##### Description et sources des données

La plupart des renseignements sur les prix utilisés pour la confection de l'indice proviennent des rapports mensuels produits par des correspondants agricoles dans tout le Canada. Les prix utilisés pour calculer l'indice se rapprochent, dans la mesure du possible, des prix obtenus par les agriculteurs au moment de la transaction, lorsque le titre de propriété change de mains pour la première fois. Ces prix comprennent les suppléments et les primes qu'il est possible de rattacher à des produits particuliers, mais non les frais d'entreposage, de transport, de traitement et de manutention qui sont défactués avant que l'agriculteur ne soit payé.

Au moment du rapport mensuel sur les prix, on demande aux correspondants d'indiquer la moyenne des prix en vigueur dans leur voisinage, en tenant compte des diverses qualités de chacun des produits sur le marché. Ainsi, les prix moyens déclarés par ces correspondants peuvent varier d'un mois à l'autre en raison des modifications de prix, des variations de la qualité offerte, ou d'une combinaison de ces deux éléments. En réalité, cet indice ne constitue pas une mesure de la simple variation de prix mais une mesure des variations des recettes des cultivateurs par unité de produit mis en vente.

Aucune rectification de prix n'a été faite pour tenir compte des variations saisonnières. Les séries peuvent subir des modifications à mesure que des données plus détaillées et plus à jour nous parviennent. Ces modifications expliquent les variations existant entre les indices publiés dans les bulletins précédents et les indices figurant dans le présent bulletin.

## Weights and Linking

As of March 1990, the index was rebased to 1986=100. The weighting period of 1981-1984 has been maintained, and the commodities included in the index remain unchanged from those included in the 1981=100 index.

When the index was rebased to 1981=100 in December 1986, certain new commodities were added and several old commodities were disaggregated so that more narrowly defined price movements could be followed. Also, with this rebasing, Newfoundland was included in the index beginning in January 1981.

The present index has four weighting periods for approximately 40 years of data. The index has been completely rebased in terms of time, weight, and coverage about every ten years. This ensures that the quantity weights reflect current production patterns. The multi-year weighting period used in the current index provides more representative weights than a single year weighting period. As noted above, the most recent rebasing was in terms of base time period only, as the weighting period and coverage are considered to still be representative of current production patterns.

This index was first published in August 1946 with a time and weight base of 1935-1939=100. In September 1969, the weight base was changed to 1960-1962=100 and the time base to 1961=100. In August 1978, the index was rebased with the time and weight base for the index of 1971=100. In December 1986, the index was rebased with a time base of 1981=100, and a weight base of 1981-1984. In March 1990, the index was again rebased with a time base of 1986=100, and the weight base was unchanged at 1981-1984=100. In each case, a Laspeyres' type (base-weighted) formula was used in calculating the index. Thus, The index expresses current farm prices as a percentage of prices prevailing in the base period.

To provide a measure of continuity, an annual series of linked index numbers on a 1986=100 base is available from 1950 to date. The monthly index has been recalculated using a 1986 time base as far back as January 1981. Annual indexes from 1950 to 1980 are linked to the current time base at January 1981.

## Data Availability

Data in this publication are also available on CANSIM Matrix 176. Additional indexes and weighting diagrams are available by contacting the Farm Income and Prices Section, as are the prices used in the calculation of the index.

## Pondérations et enchaînement

Depuis mars 1990, la base de l'indice a changé et est maintenant 1986=100. La période de pondération de 1981 à 1984 a été maintenue et les produits compris dans l'indice demeurent les mêmes que ceux de l'indice 1981=100.

Lorsque la base de l'indice est passé à 1981=100 en décembre 1986, quelques nouveaux produits ont été ajoutés et un certain nombre d'anciens produits ont été désagrégés pour permettre de suivre de façon plus précise la variation des prix. De plus, ce changement de base a permis d'inclure Terre-Neuve à partir de janvier 1981.

Le présent indice a quatre périodes de pondération et des données s'échelonnant sur 40 ans. Un changement complet de la base de l'indice (période, pondération et champ) a été effectué tous les 10 ans. Les coefficients de pondération des quantités reflètent bien ainsi les tendances de la production. La période de pondération comptant plusieurs années qui est utilisée pour l'indice actuel donne des coefficients de pondération plus représentatifs qu'une période de pondération ne comptant qu'une seule année. Comme il a été indiqué ci-dessus, le changement de base le plus récent concerne la période de base seulement car il est considéré que la période de pondération et le champ demeurent représentatifs des tendances actuelles de production.

L'indice a été publié pour la première fois en août 1946 sur la base temporelle et pondérée de 1935-1939=100. En septembre 1969, une nouvelle base pondérée a été établie, 1960-1962=100, la base temporelle étant 1961=100. En août 1978, la base de l'indice a été changée, la base temporelle et la base pondérée étant fixées à 1971=100. En décembre 1986, la base temporelle devient 1981=100 et la base pondérée 1981-1984. En mars 1990, la base de l'indice est changée, la base temporelle devenant 1986=100 et la base pondérée demeurant inchangée à 1981-1984=100. Dans chaque cas, la formule de Laspeyre a été utilisée pour le calcul de l'indice. L'indice ainsi produit représente les prix agricoles en cours, en termes de pourcentage des prix en vigueur pendant la période de référence.

Pour assurer une certaine continuité, une série annuelle d'indices raccordés à la base de 1986=100 est disponible pour la période allant de 1950 à ce jour. L'indice mensuel a été calculé de nouveau sur la base de 1986 jusqu'en janvier 1981. Les indices annuels de 1950 à 1980 sont raccordés à la base temporelle actuelle de janvier 1981.

## Données disponibles

Les données de la présente publication sont aussi disponibles sur CANSIM dans la matrice 176. Les indices additionnels, les diagrammes de pondération et les prix utilisés dans le calcul de l'indice sont disponibles en s'adressant à la Section du revenu agricole et des prix à la production.

582	British Columbia - North - Colombie-Britannique - Nord	610200

## Annexe 3

## Indice des prix des entrées dans l'agriculture - numéros de matrice et de série de CANSIM

Les prix et les indices moyens de certaines entrées agricoles sont stockées comme suit dans CANSIM selon la région géographique:

New Matrix and Series Numbers for Farm Input Price Index starting second quarter 1992 are available on CANSIM as follows:

Les nouveaux numéros de matrice et de série de l'indice des prix des entrées dans l'agriculture, à partir du deuxième trimestre de 1992, sont stockés dans CANSIM comme suit:

Matrix number	Province	Series number
n° de matrice	Province	n° de série
2050	CANADA	640000
2051	EAST CANADA - EST CANADA	640200
2052	ATLANTIC - ATLANTIQUE	640400
2053	NFLD - T.N.	640600
2054	PEI - Î.-P.-É.	640800
2055	NS - N.-É.	641000
2056	NB - N.-B.	641200
2057	QUEBEC - QUÉBEC	641400
2058	ONTARIO	641600
2059	WEST CANADA - OUEST DU CANADA	641800
2060	MANITOBA	642000
2061	SASKATCHEWAN	642200
2062	ALBERTA	642400
2063	BC - C.-B.	642600

## THANK YOU FOR YOUR ORDER!

# Canada

# Hire our team of researchers for \$56 a year

# Notre équipe de chercheurs est à votre service pour 56 \$ par année

**S**ubscribing to *Perspectives on Labour and Income* is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But *Perspectives* is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analyzing the statistics to bring you simple, clear summaries of labour market and income trends.

Our team of experts brings you the latest labour and income data. Each quarterly issue provides:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research
- information on new surveys

As a special bonus, twice a year you will also receive *The Labour Market Review*, giving you timely analysis on labour market performance over the previous six months or year.

**And all for only \$56!**

Thousands of Canadian professionals turn to *Perspectives* to discover emerging trends in labour and income and to stay up to date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find *Perspectives* indispensable. GUARANTEED. If you aren't convinced after reading the first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to *Perspectives* today (Cat. No. 75-0010XPE).

## ORDER NOW!

For only \$56 (plus \$3.92 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US\$68 for U.S. customers and US\$80 for customers in other countries. Fax your VISA or MasterCard order to: (613) 951-1584. Call toll free: 1-800-267-6677. Or mail to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication.

**S'**abonner à *L'emploi et le revenu en perspective*, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les

tendances actuelles du marché du travail et des revenus.

Notre équipe de spécialistes met à votre disposition des données récentes sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez :

- des articles de fond sur l'emploi et le revenu
- plus de 50 indicateurs clés de l'emploi et du revenu
- un aperçu de la recherche en cours
- de l'information sur les nouvelles enquêtes

En prime, vous recevrez le *Bilan du marché du travail* deux fois l'an. Vous disposerez ainsi d'une analyse à jour de la situation du marché du travail pour les six derniers mois ou la dernière année.

**Tout cela pour 56 \$ seulement!**

Des milliers de professionnels au Canada consultent *Perspective* pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que *L'emploi et le revenu en perspective* deviendra pour vous un outil indispensable. C'EST GARANTI. Si vous n'êtes pas satisfait après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à *Perspective* (n° 75-0010XPF au cat.) dès aujourd'hui.

## ABONNEZ-VOUS DÈS MAINTENANT!

Pour 56 \$ seulement (TPS de 3,92 \$ en sus), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année). L'abonnement est de 68 \$ US aux États-Unis et de 80 \$ US dans les autres pays. Faites parvenir votre commande par télécopieur (VISA ou MasterCard) au (613) 951-1584, par téléphone (sans frais) au 1-800-267-6677, par courrier à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6. Ou communiquez avec le Centre de consultation de Statistique Canada le plus près. (Voir la liste dans la présente publication).

**Don't let  
this  
happen  
to you!**

**Ne vous laissez  
pas dépasser  
par les  
événements!**

**I**magine you're called upon to make a really important business decision. You spend some anxious days weighing your options. You examine the available data. Finally, you make your decision...

...only to discover too late that your information was incomplete or outdated!

If you've ever experienced this type of frustration... or if your reputation ever depends on the quality of the data you refer to... **Infomat** is for you.

**Infomat** is your **fastest** and **easiest** way to keep on top of important Canadian economic and social trends. Since it comes to you weekly – not daily – issues won't pile up unread. And, in just one publication, you'll have the answers to almost anything:

- price indexes
- manufacturing shipments and orders
- imports and exports
- labour market conditions, and
- dozens of key social and economic indicators!

And because **Infomat** is based on over 100 ongoing Statistics Canada surveys, no other source is more timely or more reliable.

**Infomat** is specially designed and written for you – a busy manager with no time to waste!

**Join the confident, successful  
decision-makers in the country  
and subscribe to Infomat today!**

**Infomat** (catalogue no. 11-0020XPE) is only \$130 (plus \$9.10 GST) per year in Canada, US\$156 in the U.S. and US\$182 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR

FAX (613) 951-1584 and use your VISA or MasterCard. OR MAIL your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

**I**maginez que vous devez prendre une décision de gestion très importante. Vous vous faites du mauvais sang pendant quelques jours à évaluer vos options. Vous examinez les données disponibles. Vous vous décidez enfin...

... pour vous rendre compte trop tard que vous êtes fondé sur de l'information incomplète ou périmée!

Si vous avez déjà vécu ce genre de situation... ou si vous devez un jour miser votre réputation sur la qualité des données que vous avancez... **Infomat** est pour vous.

**Infomat** est la façon la plus rapide et la plus facile de se tenir au courant des tendances économiques et sociales importantes au Canada. Comme il s'agit d'un hebdomadaire – non d'un quotidien – vous aurez le temps de le lire. Et dans une seule et même publication, vous trouverez réponse à presque tout :

- indices de prix
- livraisons et commandes des fabricants
- importations et exportations
- situation du marché du travail, et des
- dizaines d'indicateurs socio-économiques clés!

Et comme **Infomat** est fondé sur plus de 100 enquêtes permanentes de Statistique Canada, aucune autre source n'est plus à jour ou plus fiable.

**Infomat** est conçu et rédigé pour des gens comme vous – des gestionnaires qui n'ont pas de temps à perdre!

**Faites comme bien d'autres décideurs au  
pays qui ont réussi et abonnez-vous à  
Infomat aujourd'hui même!**

**Infomat** (n° 11-0020XPF au catalogue) ne coûte que 130 \$ (plus 9,10 \$ de TPS) par année au Canada, 156 \$ US aux États-Unis et 182 \$ US dans les autres pays.

Vous pouvez nous joindre PAR TELEPHONE AU

1-800-267-6677 ou PAR TELECOPIEUR au (613) 951-1584 et

utiliser votre carte VISA ou MasterCard! Ou envoyez votre commande PAR LA POSTE à : Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario), K1A 0T6. Vous pouvez aussi communiquer avec le Centre de consultation de Statistique Canada le plus près. La liste de ces centres se retrouve dans la présente publication.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,  
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 Telephone:  
(1-613-951-9606) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)

## Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolinguage et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Section des industries de biens et de services,  
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 téléphone: (1-613-951-9606) ou  
au centre de consultation de Statistique Canada à:

## Note of Appreciation

*Canada owes the success of its statistical system to  
a long-standing cooperation involving Statistics  
Canada, the citizens of Canada, its businesses,  
governments and other institutions. Accurate and  
timely statistical information could not be produced  
without their continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose  
sur un partenariat bien établi entre Statistique Canada  
et la population, les entreprises, les administrations  
canadiennes et les autres organismes. Sans cette  
collaboration et cette bonne volonté, il serait impossible  
de produire des statistiques précises et actuelles.*

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- <sup>P</sup> preliminary figures.
- <sup>r</sup> revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613)951-8200.

® Registered Trade Mark of Statistics Canada.

### Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division.
- **François Bordé**, Chief, Goods & Services Producing Industries Section.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- <sup>P</sup> nombres provisoires.
- <sup>r</sup> nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6, ou téléphonez à (613)951-8200.

® Marque déposée de Statistique Canada.

### Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix.
- **François Bordé**, Chef, Section des Industries de biens et de services.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48 - 1984.

## Highlights

### Fourth Quarter of 1994

#### Farm Input Price Index (FIPI)

The Farm Input Price Index (1986=100) for the fourth quarter of 1994 stood at a preliminary level of 118.9, up 0.2% from the previous quarter and 3.8% from a year earlier. Of the seven major groups that are updated quarterly, four indexes rose from the third quarter, two did not change and one declined.

The index for interest had the largest impact on the quarterly change of the total FIPI, rising by 4.5%. The non-mortgage component was up by 6.4% while the mortgage component declined by 0.2%. The interest index is now 17.6% above its fourth quarter 1993 level.

The machinery and motor vehicle index was up by 1.6% in the quarter as all three of its component indexes went up: machinery replacement by 2.0%, motor vehicle replacement by 4.1% and machinery and motor vehicle operation by 0.9%. All three are also higher in the annual comparison, 7.9%, 13.1% and 4.7% respectively, leaving the total machinery and motor vehicle index up by 6.7%.

The hired farm labour index has been calculated as "a seasonal basket", meaning, that a composition of particular farm jobs surveyed for each quarter differs with the season. Thus, the farm labor index is updated from the same quarter a year ago, rather than from the previous quarter. The survey indicates that the aggregated hired farm labour index was 1.7% higher in the fourth quarter 1994 than in the fourth quarter 1993. The apparent quarterly change (which reflects changes in the "basket composition" as well as wage rate changes) was 3.3%.

The animal production index, which was down by 3.4%, had an offsetting impact on the change of the total FIPI in the quarter. The decrease was mainly a consequence of lower prices for feeder cattle (-7.2%) due mainly to decreases in Western Canada, and weanling hogs (-7.6) due to lower prices in the East. The feed index was up only slightly, despite large increases in feed grain prices, especially wheat.

The Eastern Canada total index increased 0.2% over the quarter. The pattern of quarterly changes was similar to that at the National level. Of the seven major group indexes, four were up and one did not change; only the animal production and building and fencing indexes declined (-3.7% and -0.4 respectively). The total index for Eastern Canada is now 2.4% higher than a year ago.

The Western Canada total index was up marginally (0.1%) from its level in the third quarter, as increases in four of its components were only partially offset by declines in the remaining three. Over the year, the Western Canada Total Farm Input Price Index has risen by 5.0%.

At the provincial level, quarterly changes in the FIPI total ranged from -0.7% to 1.3%; five of them being negative and five positive.

## Faits saillants

### Quatrième trimestre de 1994

#### Indice des prix des entrées dans l'agriculture (IPEA)

L'indice des prix des entrées dans l'agriculture (1986=100) pour le quatrième trimestre de 1994 a atteint le niveau provisoire de 118,9, soit 0,2% de plus qu'au trimestre précédent et 3,8% de plus que l'année précédente. Des sept grands groupes d'indices qui sont mis à jour chaque trimestre, quatre ont augmenté par rapport au troisième trimestre, deux n'ont pas varié et un a diminué.

L'indice de l'intérêt a eu la plus forte incidence sur la variation trimestrielle de l'IPEA global. Il a progressé de 4,5% étant donné que la composante non hypothécaire s'est accrue de 6,4% en dépit de la baisse de 0,2% de la composante hypothécaire. L'indice de l'intérêt est maintenant supérieur de 17,6% au niveau atteint au quatrième trimestre de 1993.

L'indice des machines et des véhicules automobiles s'est accru de 1,6% au cours du trimestre, compte tenu de la hausse de ses trois composantes : remplacement des machines 2,0%, remplacement des véhicules automobiles 4,1% et exploitation de machines et de véhicules automobiles 0,9%. Ces trois indices ont également augmenté comparativement à l'année précédente, de 7,9%, 13,1% et 4,7% respectivement, ce qui fait que la hausse de l'indice global des machines et des véhicules automobiles est de 6,7%.

L'indice de la main-d'œuvre agricole salariée a été calculé comme un «panier saisonnier», ce qui signifie que la combinaison des emplois agricoles pris en compte dans l'enquête à chaque trimestre varie selon la saison. Par conséquent, l'indice de la main-d'œuvre agricole est mis à jour par rapport au même trimestre de l'année précédente et non pas par rapport au trimestre précédent. L'enquête révèle que l'indice agrégé de la main-d'œuvre agricole salarié était, au quatrième trimestre de 1994, supérieur de 1,7% à celui du quatrième trimestre de 1993. La variation trimestrielle apparente (qui tient compte des variations de la «composition du panier» et de celles du taux de rémunération) était de 3,3%.

L'indice pour l'élevage d'animaux, qui a reculé de 3,4%, a exercé une influence compensatoire sur la variation de l'IPEA global au cours du trimestre. Le repli découle surtout de la baisse des prix des bovins d'engraissement (-7,2%), découlant surtout des diminutions dans l'Ouest du Canada, et des prix des porcelets sevrés (-7,6%), en majeure partie attribuable à la baisse des prix dans l'Est. L'indice des aliments pour animaux n'a que légèrement augmenté, en dépit des fortes hausses du prix des grains fourragers, en particulier du blé.

Dans l'est du pays, l'indice global s'est accru de 0,2% par rapport au trimestre précédent. Le cycle des variations trimestrielles était similaire à celui observé au niveau national. Quatre des sept grands groupes d'indices ont augmenté et un ne pas changer. Seuls l'indice pour l'élevage d'animaux et celui du bâtiment et des clôtures ont diminué (-3,7% et -0,4% respectivement). Pour l'est du Canada, l'indice global est maintenant supérieur de 2,4% à celui de l'an dernier.

Pour l'ouest du Canada, l'indice global a légèrement progressé de 0,1% par rapport au troisième trimestre, les hausses de quatre de ses composantes ayant été neutralisées partiellement par les baisses des trois autres. Pendant l'année, l'indice global des prix des entrées dans l'agriculture pour l'ouest du Canada s'est accru de 5,0% par rapport à l'an dernier.

Au niveau provincial, les variations saisonnières de l'IPEA global étaient comprises entre -0,7% et 1,3%, cinq étant négatives et cinq positives.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. d'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years. (2) Selected items. (3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II. (4) In cases where a commodity has two D numbers, the top number is the old D number which is terminated as of first quarter 1994, and the bottom number is the newly assigned number to be used from now on.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre. (2) Certains items. (3) Les groupes et sous-groupes de produits sont identifiés par le type de caractères d'imprimerie et par l'espacement. Pour plus d'explications, veuillez voir les appendices I ou II. (4) Dans les cas, où un produit a deux numéros D de banque de données, le numéro du dessus est l'ancien numéro D qui a été discontinué au premier trimestre de 1994, alors que le numéro du dessous est le nouveau numéro assigné qui est utilisé à partir de maintenant.

(1) The indexes are subject to a two-stage revision. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

## TECHNICAL NOTES

### FARM INPUT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939 = 100 for the years 1913 to 1971.

#### Index formula

A general formula for an index made up of several items for the current period ( $I_{t/0}$ ) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

## NOTES TECHNIQUES

### INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986 = 100)

#### 1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

#### Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ( $I_{t/0}$ ) est la suivante:

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

#### For further information

For data only, please contact the information unit at 613-951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at 613-951-3342. The addresses are on the inside front cover of this book.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

#### Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613-951-3350) ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au 613-951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

(1) As of August 1992, current initial prices are used for wheat and barley in Western Canada.

(1) À partir du mois d'août 1992, les prix initiaux courants sont utilisés pour le blé et l'orge de l'ouest canadien.

## TECHNICAL NOTES

### FARM PRODUCT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

##### Definition and Coverage

The Farm Product Price Index (FPPI), formerly called Index Numbers of Farm Prices of Agricultural Products, measures the change through time in the prices received for agricultural commodities at the first transaction point.

The commodities included in the index are, for the most part, the same commodities that are estimated in the farm cash receipts series published in Agriculture Economic Statistics, Catalogue 21-603. From 1957 to date, the index is based upon products which account for about 95% of total farm cash receipts from farming operations for both the 1960-62 and 1971 weight base period. For years prior to 1957, the index was based upon products which accounted for about 90% of total cash receipts.

Users should note that Newfoundland was not included in the index prior to 1981. As a result, a break in the Canada series occurs in 1981. Nevertheless, Newfoundland's agricultural production is relatively small and the break is not significant.

##### Data Description and Sources

Much of the price information used in compiling the index is obtained from a monthly survey of farm respondents throughout Canada. Where possible, administrative data are used as price sources in order to reduce response burden. The prices used in computing the index are, as closely as can be determined, the transaction prices received by farmers when ownership first changes hands. These prices include any bonuses and premiums which can be attributed to specific commodities, but they exclude any storage, transportation, processing and handling charges which are deducted before the farmer is paid.

In reporting prices each month, survey respondents are asked to report the average prices prevailing in their neighbourhood, taking into account the various grades of each commodity marketed. Thus, average prices reported by these respondents may differ from month to month as a result of changes in price, changes in quality, or a combination of both. In effect, this index is not a measure of pure price change but a measure of the change in the return to farmers per unit of product marketed.

No adjustment for seasonal variation of prices has been made in the index. Also, the series is subject to revision as more complete and up-to-date data become available. This accounts for any changes between the indexes published in earlier reports and those appearing in the current publication.

## NOTES TECHNIQUES

### INDICE DES PRIX DES PRODUITS AGRICOLES (1986 = 100)

#### 1. Concepts, description des données et méthodes

##### Définition et champ d'observation

L'indice des prix des produits agricoles (IPPA), qui était auparavant appelé les nombres-indices des prix à la ferme des produits agricoles, mesure la variation des prix reçus pour les produits agricoles au premier point de transaction.

Les produits figurant dans l'indice sont, à quelques exceptions près, les mêmes que ceux qui figurent dans la série sur les recettes monétaires agricoles publiée dans le bulletin Statistique économiques agricoles, n° 21-603 au catalogue. Pour la période de 1957 à date, l'indice est basé sur les produits qui représentent environ 95% des recettes globales en espèces touchées au cours de la période de base pondérée 1960-62 et 1971. Avant 1957 inclusivement, l'indice était basé sur les prix des produits représentant environ 90% des recettes globales en espèces des cultivateurs.

Comme les chiffres de Terre-Neuve ont été pris en compte dans l'indice en 1981, il se produit une solution de continuité dans la série du Canada à ce moment-là. Cependant, comme la production agricole de cette province n'est pas considérable, cette solution de continuité n'est pas importante.

##### Description et sources des données

La plupart des renseignements sur les prix utilisés pour la confection de l'indice proviennent des rapports mensuels produits par des correspondants agricoles dans tout le Canada. Les prix utilisés pour calculer l'indice se rapprochent, dans la mesure du possible, des prix obtenus par les agriculteurs au moment de la transaction, lorsque le titre de propriété change de mains pour la première fois. Ces prix comprennent les suppléments et les primes qu'il est possible de rattacher à des produits particuliers, mais non les frais d'entreposage, de transport, de traitement et de manutention qui sont défacturés avant que l'agriculteur ne soit payé.

Au moment du rapport mensuel sur les prix, on demande aux correspondants d'indiquer la moyenne des prix en vigueur dans leur voisinage, en tenant compte des diverses qualités de chacun des produits sur le marché. Ainsi, les prix moyens déclarés par ces correspondants peuvent varier d'un mois à l'autre en raison des modifications de prix, des variations de la qualité offerte, ou d'une combinaison de ces deux éléments. En réalité, cet indice ne constitue pas une mesure de la simple variation de prix mais une mesure des variations des recettes des cultivateurs par unité de produit mis en vente.

Aucune rectification de prix n'a été faite pour tenir compte des variations saisonnières. Les séries peuvent subir des modifications à mesure que des données plus détaillées et plus à jour nous parviennent. Ces modifications expliquent les variations existant entre les indices publiés dans les bulletins précédents et les indices figurant dans le présent bulletin.

## Weights and Linking

As of March 1990, the index was rebased to 1986=100. The weighting period of 1981-1984 has been maintained, and the commodities included in the index remain unchanged from those included in the 1981=100 index.

When the index was rebased to 1981=100 in December 1986, certain new commodities were added and several old commodities were disaggregated so that more narrowly defined price movements could be followed. Also, with this rebasing, Newfoundland was included in the index beginning in January 1981.

The present index has four weighting periods for approximately 40 years of data. The index has been completely rebased in terms of time, weight, and coverage about every ten years. This ensures that the quantity weights reflect current production patterns. The multi-year weighting period used in the current index provides more representative weights than a single year weighting period. As noted above, the most recent rebasing was in terms of base time period only, as the weighting period and coverage are considered to still be representative of current production patterns.

This index was first published in August 1946 with a time and weight base of 1935-1939=100. In September 1969, the weight base was changed to 1960-1962=100 and the time base to 1961=100. In August 1978, the index was rebased with the time and weight base for the index of 1971=100. In December 1986, the index was rebased with a time base of 1981=100, and a weight base of 1981-1984. In March 1990, the index was again rebased with a time base of 1986=100, and the weight base was unchanged at 1981-1984=100. In each case, a Laspeyres' type (base-weighted) formula was used in calculating the index. Thus, The index expresses current farm prices as a percentage of prices prevailing in the base period.

To provide a measure of continuity, an annual series of linked index numbers on a 1986=100 base is available from 1950 to date. The monthly index has been recalculated using a 1986 time base as far back as January 1981. Annual indexes from 1950 to 1980 are linked to the current time base at January 1981.

## Data Availability

Data in this publication are also available on CANSIM Matrix 176. Additional indexes and weighting diagrams are available by contacting the Farm Income and Prices Section, as are the prices used in the calculation of the index.

## Pondérations et enchaînement

Depuis mars 1990, la base de l'indice a changé et est maintenant 1986=100. La période de pondération de 1981 à 1984 a été maintenue et les produits compris dans l'indice demeurent les mêmes que ceux de l'indice 1981=100.

Lorsque la base de l'indice est passé à 1981=100 en décembre 1986, quelques nouveaux produits ont été ajoutés et un certain nombre d'anciens produits ont été désagrégés pour permettre de suivre de façon plus précise la variation des prix. De plus, ce changement de base a permis d'inclure Terre-Neuve à partir de janvier 1981.

Le présent indice a quatre périodes de pondération et des données s'échelonnant sur 40 ans. Un changement complet de la base de l'indice (période, pondération et champ) a été effectué tous les 10 ans. Les coefficients de pondération des quantités reflètent bien ainsi les tendances de la production. La période de pondération comptant plusieurs années qui est utilisée pour l'indice actuel donne des coefficients de pondération plus représentatifs qu'une période de pondération ne comptant qu'une seule année. Comme il a été indiqué ci-dessus, le changement de base le plus récent concerne la période de base seulement car il est considéré que la période de pondération et le champ demeurent représentatifs des tendances actuelles de production.

L'indice a été publié pour la première fois en août 1946 sur la base temporelle et pondérée de 1935-1939=100. En septembre 1969, une nouvelle base pondérée a été établie, 1960-1962=100, la base temporelle étant 1961=100. En août 1978, la base de l'indice a été changée, la base temporelle et la base pondérée étant fixées à 1971=100. En décembre 1986, la base temporelle devient 1981=100 et la base pondérée 1981-1984. En mars 1990, la base de l'indice est changée, la base temporelle devenant 1986=100 et la base pondérée demeurant inchangée à 1981-1984=100. Dans chaque cas, la formule de Laspeyre a été utilisée pour le calcul de l'indice. L'indice ainsi produit représente les prix agricoles en cours, en termes de pourcentage des prix en vigueur pendant la période de référence.

Pour assurer une certaine continuité, une série annuelle d'indices raccordés à la base de 1986=100 est disponible pour la période allant de 1950 à ce jour. L'indice mensuel a été calculé de nouveau sur la base de 1986 jusqu'en janvier 1981. Les indices annuels de 1950 à 1980 sont raccordés à la base temporelle actuelle de janvier 1981.

## Données disponibles

Les données de la présente publication sont aussi disponibles sur CANSIM dans la matrice 176. Les indices additionnels, les diagrammes de pondération et les prix utilisés dans le calcul de l'indice sont disponibles en s'adressant à la Section du revenu agricole et des prix à la production.

## Appendix 3

## Farm Input Price Index - CANSIM Matrix and Series Numbers

Average prices and indexes of Selected Farm Inputs are now available on CANSIM by geographic regions as follows:

Matrix	Geographic Regions	Series Number
Matrice	Région géographique	n° de série
550	Newfoundland - Terre-Neuve	607000
551	Prince Edward Island - Île-du-Prince-Édouard	607100
552	Nova Scotia - Nouvelle-Écosse	607200
553	New Brunswick - Nouveau-Brunswick	607300
554	Quebec - East - Québec - Est	607400
555	Quebec - South - Québec - Sud	607500
556	Quebec - West-Central - Québec - Ouest-Centre	607600
557	Quebec - East-Central - Québec - Est-Centre	607700
558	Quebec - West - Québec - Ouest	607800
559	Ontario - South - Ontario - Sud	607900
560	Ontario - North - Ontario - Nord	608000
561	Ontario - Central - Ontario - Centre	608100
562	Ontario - East - Ontario - Est	608200
563	Ontario - West - Ontario - Ouest	608300
564	Manitoba - South-West - Manitoba - Sud-Ouest	608400
565	Manitoba - North-West - Manitoba - Nord-Ouest	608500
566	Manitoba - Central - Manitoba - Centre	608600
567	Manitoba - East - Manitoba - Est	608700
568	Saskatchewan - South-East - Saskatchewan - Sud-Est	608800
569	Saskatchewan - South-West - Saskatchewan - Sud-Ouest	608900
570	Saskatchewan - West-Central - Saskatchewan - Ouest-Centre	609000
571	Saskatchewan - East-Central - Saskatchewan - Est-Centre	609100
572	Saskatchewan - North - Saskatchewan - Nord	609200
573	Alberta - South-East - Alberta - Sud-Est	609300
574	Alberta - South-Central - Alberta - Sud-Centre	609400
575	Alberta - South-West - Alberta - Sud-Ouest	609500
576	Alberta - East-Central - Alberta - Est-Centre	609600
577	Alberta - West-Central - Alberta - Ouest-Centre	609700
578	Alberta - North-East - Alberta - Nord-Est	609800
579	Alberta - North-West - Alberta - Nord-Ouest	609900
580	British Columbia - West - Colombie-Britannique - Ouest	610000
581	British Columbia - East - Colombie-Britannique - Est	610100
582	British Columbia - North - Colombie-Britannique - Nord	610200

New Matrix and Series Numbers for Farm Input Price Index starting second quarter 1992 are available on CANSIM as follows:

Matrix number	Province	Series number
n° de matrice	Province	n° de série
2050	CANADA	640000
2051	EAST CANADA - EST CANADA	640200
2052	ATLANTIC - ATLANTIQUE	640400
2053	NFLD - T.N.	640600
2054	PEI - Î.-P.-É.	640800
2055	NS - N.-É.	641000
2056	NB - N.-B.	641200
2057	QUEBEC - QUÉBEC	641400
2058	ONTARIO	641600
2059	WEST CANADA - OUEST DU CANADA	641800
2060	MANITOBA	642000
2061	SASKATCHEWAN	642200
2062	ALBERTA	642400
2063	BC - C.-B.	642600

**MERCI DE VOTRE COMMANDE!**

# Pick a topic... any topic

The **1994 Statistics Canada Catalogue** is your guide to the most complete collection of facts and figures on Canada's changing business, social and economic environment. No matter what you need to know, the **Catalogue** will point you in the right direction.

From the most popular topics of the day – like employment, income, trade, and education – to specific research studies – like mineral products shipped from Canadian ports and criminal victimization in urban areas – you'll find it all here.

... the **1994 Statistics Canada Catalogue** will help you get your bearings...

The **Catalogue** puts all this information at your fingertips. With the expanded index, you can search by subject, author or title – even periodical articles are indexed. There's also a separate index for all our electronic products.

The **Catalogue** has everything you need to access all Statistics Canada's products:

- descriptions of over 25 new titles, plus succinct abstracts of the over 650 titles and 7 map series already produced;
- a complete guide to finding and using statistics;
- electronic products in a variety of media, and

advice on getting expert assistance on electronic products and on-line searches;

• tabs on each section – so you can immediately flip to the information you need.

## ... time and time again

To make sure that the **Catalogue** stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today – you'll be lost without it.

## 1994 Statistics Canada Catalogue

Only \$15 in Canada (US\$18 in the U.S. and US\$21 in other countries). Quote Cat. no. 11-2040XPE.

# Choisissez un sujet... n'importe lequel

Le **Catalogue de Statistique Canada 1994** est votre guide pour la collection la plus complète de faits et de chiffres dans les domaines, en constante évolution, du commerce, de la société et de l'économie du Canada. Peu importe ce que vous voulez savoir, le **Catalogue** vous mettra sur la bonne piste.

Des sujets actuels les plus populaires – comme l'emploi, le revenu, le commerce et l'éducation – à des études de recherche spécialisées – comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines – vous trouverez tout dans ce document.

## Le Catalogue de Statistique Canada 1994 vous aidera à vous orienter...

Le **Catalogue** vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre – les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le **Catalogue** a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

- descriptions de plus de 25 nouveaux titres et courts résumés des 650 titres et plus et des 7 séries de cartes déjà disponibles;
- guide complet pour obtenir et utiliser les données statistiques;
- produits électroniques sur supports divers et

conseils sur l'obtention d'aide d'experts pour les produits électroniques et les recherches en direct;

• système d'onglets pour chaque section – pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

## ...maintes et maintes fois

Pour garantir que le **Catalogue** puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui – vous ne pourrez plus vous en passer.

## Catalogue de Statistique Canada 1994

Seulement 15 \$ au Canada (18 \$ US aux États-Unis et 21 \$ US dans les autres pays). Indiquez le n° au catalogue : 11-2040XPE.

# Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture -- only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistic Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

## A single source

Consultations with our many readers -- financial analysts, planners, economists and business leaders -- have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

## Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts -- names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** -- at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

---

The *Canadian Economic Observer* (catalogue no. 10-2300XPB) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries. Highlights of the *Canadian Composite Leading Indicator* (catalogue no. 11F0008XFE) are available by fax -- the same day of release -- for \$70 annually in Canada and US\$70 in the United States.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

# Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

## Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

## Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique annuel à titre gracieux**.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

---

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-2300XPB au catalogue) est de 220 \$ au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays. Les faits saillants de l'**Indicateur composite avance** (n° 11F0008XFF au catalogue) sont offerts par télécopieur -- le jour même de leur parution -- pour 70 \$ par année au Canada et 70 \$ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

## How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Marketing Division, Sales and Service, Statistics Canada, Ottawa, K1A 0T6.

(1-613-951-7277)  
Facsimile number (1-613-951-1584)  
Toronto Credit Card Only (1-416-973-8018)

## Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinaire et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Sous-section du service à la clientèle,  
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 téléphone: (1-613-951-3350) ou au centre de consultation de Statistique Canada à:

## Note of Appreciation

*Canada owes the success of its statistical system to  
a long-standing cooperation involving Statistics  
Canada, the citizens of Canada, its businesses,  
governments and other institutions. Accurate and  
timely statistical information could not be produced  
without their continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose  
sur un partenariat bien établi entre Statistique Canada  
et la population, les entreprises, les administrations  
canadiennes et les autres organismes. Sans cette  
collaboration et cette bonne volonté, il serait impossible  
de produire des statistiques précises et actuelles.*

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- <sup>P</sup> preliminary figures.
- <sup>r</sup> revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613)951-8200.

® Registered Trade Mark of Statistics Canada.

### Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division.
- **François Bordé**, Chief, Goods & Services Producing Industries Section.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- <sup>P</sup> nombres provisoires.
- <sup>r</sup> nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6, ou téléphonez à (613)951-8200.

® Marque déposée de Statistique Canada.

### Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix.
- **François Bordé**, Chef, Section des Industries de biens et de services.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48 - 1984.

## Highlights

### First Quarter of 1995

#### Farm Input Price Index (FIP1)

#### First quarter increase in farm input prices largest since the base year 1986

The farm input prices increased 2.2% in the first quarter and the total index was at 120.3; that is, farmers had to pay \$20.30 on average more in the first quarter 1995 than during the base year 1986. Prices were up for almost all input groups with the exception of hired farm labour. The most significant increases were in cost of interest and for inputs to crop production. The year-to-year change in the total index was +3.8%.

#### Cost of borrowing was up

The interest index was 11.0% higher in the first quarter, mainly due to a sizable jump in the non-mortgage group which rose by more than fifteen percent; the main factor was a rise in the non-mortgage interest rate. The non-mortgage index is now over forty percent higher than a year ago, pushing the overall cost of borrowing almost thirty percent up.

#### Lower world fertilizer supply pushes prices up

The crop production inputs are on average 3.4% up mainly due to a seven percent higher fertilizer prices. According to the press releases, Russia and other countries of the former Soviet Union closed a number of their fertilizer plants and thus reduced global supply. Their trading partners, including China, have risen their demand for fertilizer. This translated naturally into higher world prices. In the first quarter 1995, fertilizer was over eighteen percent more expensive than in the same quarter 1994.

#### Western Canada prices grew faster than in the East

West from Ontario the prices were up 2.9%, while east from Manitoba the quarterly price increase was just 1.6%. The West faced larger increases in the seed, fertilizer and grain feed prices. It also recorded an apparent increase in farm wages; in the East, these wages were down. The movement in farm wages is, however, of a seasonal nature and a year-to-year comparison is more appropriate; on the annual basis, farm wages in the Western provinces still rose faster.

## Faits saillants

### Premier trimestre de 1995

#### Indice des prix des entrées dans l'agriculture (IPEA)

#### Plus importante augmentation des prix des entrées dans l'agriculture depuis l'année de base 1986

Au premier trimestre, les prix des entrées dans l'agriculture ont augmenté de 2,2% et l'indice total s'est établi à 120,3; cela signifie que les prix payés par les agriculteurs au premier trimestre de 1995 dépassaient en moyenne de 20,30 \$ ceux de l'année de base 1986. Des hausses de prix ont été observées pour presque tous les groupes d'entrées, sauf la main-d'œuvre agricole salariée. L'intérêt et les cultures agricoles ont le plus augmenté. D'une année à l'autre, l'indice total a progressé de +3,8%.

#### Hausse du coût des emprunts

L'indice des intérêts a fait un bond de 11,0% au premier trimestre, surtout en raison du groupe des autres intérêts qui a progressé de plus de quinze pour cent; le principal facteur en cause a été le relèvement du taux d'intérêt non hypothécaire. L'indice des autres intérêts dépasse maintenant de plus de quarante pour cent son niveau d'il y a un an, ce qui a fait augmenter le coût global des emprunts de près de trente pour cent.

#### Majoration des engrais due à la baisse des stocks mondiaux

Les entrées dans les cultures agricoles sont en hausse de 3,4% en moyenne en raison principalement d'une augmentation de sept pour cent des prix des engrais. Selon les communiqués, la Russie et d'autres pays de l'ancienne Union soviétique ont fermé un certain nombre de leurs usines d'engrais, réduisant par le fait même l'offre mondiale. Les partenaires commerciaux de ces pays, dont la Chine, ont accru leur demande d'engrais. Cela a évidemment fait monter les prix mondiaux. Au premier trimestre de 1995, le prix des engrais était supérieur de plus de dix-huit pour cent à ce qu'il était au trimestre correspondant de 1994.

#### Augmentation plus rapide des prix dans l'Ouest canadien que dans l'Est

À l'ouest de l'Ontario, les prix étaient en hausse de 2,9%, alors qu'à l'est du Manitoba, l'augmentation trimestrielle des prix n'était que de 1,6%. Les prix des semences, des engrais et des grains ont augmenté davantage dans l'Ouest. Il semble aussi que les salaires agricoles ont progressé dans l'Ouest, alors qu'ils ont baissé dans l'Est. Le mouvement des salaires agricoles est toutefois de nature saisonnière et une comparaison d'une année à l'autre est plus révélatrice; sur une base annuelle, l'accroissement des salaires agricoles dans les provinces de l'Ouest est encore plus important.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. d'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years. (2) Selected items. (3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II. (4) In cases where a commodity has two D numbers, the top number is the old D number which is terminated as of first quarter 1994, and the bottom number is the newly assigned number to be used from now on.

(1) Les indices font l'objet d'une révision en deux temps. Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

## TECHNICAL NOTES

### FARM INPUT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939 = 100 for the years 1913 to 1971.

#### Index formula

A general formula for an index made up of several items for the current period ( $I_{t/0}$ ) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

## NOTES TECHNIQUES

### INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986 = 100)

#### 1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

#### Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ( $I_{t/0}$ ) est la suivante:

where  $p_t$  is the price of an item in the current period, and  $p_o$ ,  $q_o$  and  $p_o q_o$  are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

$$I_{t/o} = \sum (p_t / p_o) w$$

where

$$W = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item - its percentage share in the total expenditure in the base period for all items in the index of which it is part.

### Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

### Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

où  $p_t$  est le prix de l'article au cours de la période courante,  $p_o$ ,  $q_o$  et  $p_o q_o$  représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

où

Exprimé de cette façon, "w" est le poids en pourcentage d'un article - soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

### Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

### Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'œuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

## Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

## Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue No. 11-001) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

## Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

## Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

## Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001 au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

## Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

### For further information

For data only, please contact the information unit at 613-951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at 613-951-3342. The addresses are on the inside front cover of this book.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

### Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613-951-3350) ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au 613-951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

(1) As of August 1992, current initial prices are used for wheat and barley in Western Canada.

(1) À partir du mois d'août 1992, les prix initiaux courants sont utilisés pour le blé et l'orge de l'ouest canadien.

## TECHNICAL NOTES

### FARM PRODUCT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

##### Definition and Coverage

The Farm Product Price Index (FPPi), formerly called Index Numbers of Farm Prices of Agricultural Products, measures the change through time in the prices received for agricultural commodities at the first transaction point.

The commodities included in the index are, for the most part, the same commodities that are estimated in the farm cash receipts series published in Agriculture Economic Statistics, Catalogue 21-603. From 1957 to date, the index is based upon products which account for about 95% of total farm cash receipts from farming operations for both the 1960-62 and 1971 weight base period. For years prior to 1957, the index was based upon products which accounted for about 90% of total cash receipts.

Users should note that Newfoundland was not included in the index prior to 1981. As a result, a break in the Canada series occurs in 1981. Nevertheless, Newfoundland's agricultural production is relatively small and the break is not significant.

#### Data Description and Sources

Much of the price information used in compiling the index is obtained from a monthly survey of farm respondents throughout Canada. Where possible, administrative data are used as price sources in order to reduce response burden. The prices used in computing the index are, as closely as can be determined, the transaction prices received by farmers when ownership first changes hands. These prices include any bonuses and premiums which can be attributed to specific commodities, but they exclude any storage, transportation, processing and handling charges which are deducted before the farmer is paid.

In reporting prices each month, survey respondents are asked to report the average prices prevailing in their neighbourhood, taking into account the various grades of each commodity marketed. Thus, average prices reported by these respondents may differ from month to month as a result of changes in price, changes in quality, or a combination of both. In effect, this index is not a measure of pure price change but a measure of the change in the return to farmers per unit of product marketed.

No adjustment for seasonal variation of prices has been made in the index. Also, the series is subject to revision as more complete and up-to-date data become available. This accounts for any changes between the indexes published in earlier reports and those appearing in the current publication.

## NOTES TECHNIQUES

### INDICE DES PRIX DES PRODUITS AGRICOLES (1986 = 100)

#### 1. Concepts, description des données et méthodes

##### Définition et champ d'observation

L'indice des prix des produits agricoles (IPPA), qui était auparavant appelé les nombres-indices des prix à la ferme des produits agricoles, mesure la variation des prix reçus pour les produits agricoles au premier point de transaction.

Les produits figurant dans l'indice sont, à quelques exceptions près, les mêmes que ceux qui figurent dans la série sur les recettes monétaires agricoles publiée dans le bulletin Statistique économiques agricoles, n° 21-603 au catalogue. Pour la période de 1957 à date, l'indice est basé sur les produits qui représentent environ 95% des recettes globales en espèces touchées au cours de la période de base pondérée 1960-62 et 1971. Avant 1957 inclusivement, l'indice était basé sur les prix des produits représentant environ 90% des recettes globales en espèces des cultivateurs.

Comme les chiffres de Terre-Neuve ont été pris en compte dans l'indice en 1981, il se produit une solution de continuité dans la série du Canada à ce moment-là. Cependant, comme la production agricole de cette province n'est pas considérable, cette solution de continuité n'est pas importante.

#### Description et sources des données

La plupart des renseignements sur les prix utilisés pour la confection de l'indice proviennent des rapports mensuels produits par des correspondants agricoles dans tout le Canada. Les prix utilisés pour calculer l'indice se rapprochent, dans la mesure du possible, des prix obtenus par les agriculteurs au moment de la transaction, lorsque le titre de propriété change de mains pour la première fois. Ces prix comprennent les suppléments et les primes qu'il est possible de rattacher à des produits particuliers, mais non les frais d'entreposage, de transport, de traitement et de manutention qui sont défactués avant que l'agriculteur ne soit payé.

Au moment du rapport mensuel sur les prix, on demande aux correspondants d'indiquer la moyenne des prix en vigueur dans leur voisinage, en tenant compte des diverses qualités de chacun des produits sur le marché. Ainsi, les prix moyens déclarés par ces correspondants peuvent varier d'un mois à l'autre en raison des modifications de prix, des variations de la qualité offerte, ou d'une combinaison de ces deux éléments. En réalité, cet indice ne constitue pas une mesure de la simple variation de prix mais une mesure des variations des recettes des cultivateurs par unité de produit mis en vente.

Aucune rectification de prix n'a été faite pour tenir compte des variations saisonnières. Les séries peuvent subir des modifications à mesure que des données plus détaillées et plus à jour nous parviennent. Ces modifications expliquent les variations existant entre les indices publiés dans les bulletins précédents et les indices figurant dans le présent bulletin.

## Weights and Linking

As of March 1990, the index was rebased to 1986=100. The weighting period of 1981-1984 has been maintained, and the commodities included in the index remain unchanged from those included in the 1981=100 index.

When the index was rebased to 1981=100 in December 1986, certain new commodities were added and several old commodities were disaggregated so that more narrowly defined price movements could be followed. Also, with this rebasing, Newfoundland was included in the index beginning in January 1981.

The present index has four weighting periods for approximately 40 years of data. The index has been completely rebased in terms of time, weight, and coverage about every ten years. This ensures that the quantity weights reflect current production patterns. The multi-year weighting period used in the current index provides more representative weights than a single year weighting period. As noted above, the most recent rebasing was in terms of base time period only, as the weighting period and coverage are considered to still be representative of current production patterns.

This index was first published in August 1946 with a time and weight base of 1935-1939=100. In September 1969, the weight base was changed to 1960-1962=100 and the time base to 1961=100. In August 1978, the index was rebased with the time and weight base for the index of 1971=100. In December 1986, the index was rebased with a time base of 1981=100, and a weight base of 1981-1984. In March 1990, the index was again rebased with a time base of 1986=100, and the weight base was unchanged at 1981-1984=100. In each case, a Laspeyres' type (base-weighted) formula was used in calculating the index. Thus, The index expresses current farm prices as a percentage of prices prevailing in the base period.

To provide a measure of continuity, an annual series of linked index numbers on a 1986=100 base is available from 1950 to date. The monthly index has been recalculated using a 1986 time base as far back as January 1981. Annual indexes from 1950 to 1980 are linked to the current time base at January 1981.

## Data Availability

Data in this publication are also available on CANSIM Matrix 176. Additional indexes and weighting diagrams are available by contacting the Farm Income and Prices Section, as are the prices used in the calculation of the index.

## Pondérations et enchaînement

Depuis mars 1990, la base de l'indice a changé et est maintenant 1986=100. La période de pondération de 1981 à 1984 a été maintenue et les produits compris dans l'indice demeurent les mêmes que ceux de l'indice 1981=100.

Lorsque la base de l'indice est passé à 1981=100 en décembre 1986, quelques nouveaux produits ont été ajoutés et un certain nombre d'anciens produits ont été désagrégés pour permettre de suivre de façon plus précise la variation des prix. De plus, ce changement de base a permis d'inclure Terre-Neuve à partir de janvier 1981.

Le présent indice a quatre périodes de pondération et des données s'échelonnant sur 40 ans. Un changement complet de la base de l'indice (période, pondération et champ) a été effectué tous les 10 ans. Les coefficients de pondération des quantités reflètent bien ainsi les tendances de la production. La période de pondération comptant plusieurs années qui est utilisée pour l'indice actuel donne des coefficients de pondération plus représentatifs qu'une période de pondération ne comptant qu'une seule année. Comme il a été indiqué ci-dessus, le changement de base le plus récent concerne la période de base seulement car il est considéré que la période de pondération et le champ demeurent représentatifs des tendances actuelles de production.

L'indice a été publié pour la première fois en août 1946 sur la base temporelle et pondérée de 1935-1939=100. En septembre 1969, une nouvelle base pondérée a été établie, 1960-1962=100, la base temporelle étant 1961=100. En août 1978, la base de l'indice a été changée, la base temporelle et la base pondérée étant fixées à 1971=100. En décembre 1986, la base temporelle devient 1981=100 et la base pondérée 1981-1984. En mars 1990, la base de l'indice est changée, la base temporelle devenant 1986=100 et la base pondérée demeurant inchangée à 1981-1984=100. Dans chaque cas, la formule de Laspeyre a été utilisée pour le calcul de l'indice. L'indice ainsi produit représente les prix agricoles en cours, en termes de pourcentage des prix en vigueur pendant la période de référence.

Pour assurer une certaine continuité, une série annuelle d'indices raccordés à la base de 1986=100 est disponible pour la période allant de 1950 à ce jour. L'indice mensuel a été calculé de nouveau sur la base de 1986 jusqu'en janvier 1981. Les indices annuels de 1950 à 1980 sont raccordés à la base temporelle actuelle de janvier 1981.

## Données disponibles

Les données de la présente publication sont aussi disponibles sur CANSIM dans la matrice 176. Les indices additionnels, les diagrammes de pondération et les prix utilisés dans le calcul de l'indice sont disponibles en s'adressant à la Section du revenu agricole et des prix à la production.

## MERCI DE VOTRE COMMANDE!

Statistique Canada      Statistics Canada

# Canada

# CANADA A PORTRAIT

A CELEBRATION  
OF OUR GREAT NATION

# UN PORTRAIT DU CANADA

POUR CÉLÉBRER LA  
GRANDEUR DE NOTRE PAYS

Canada challenges the imagination. Imagine a country where Newfoundlanders live closer to Africans than they do to fellow Canadians in British Columbia. Or a country with an island that has a glacier bigger than Ireland. Imagine a country with two million lakes, and the world's longest coastline – but that shares a border with only one nation.

Statistics Canada has created the 54th edition of **Canada: A Portrait** as a celebration of our great nation. Drawn from Statistics Canada's rich palette of national data, it paints a picture of where we are socially, economically, culturally and politically.

Over 60 unique and beautiful photographs combined with lively text, provide a close-up look at the Canada of today.

Experience this land's remarkable natural regions and diverse human landscape through six chapters entitled: **This Land, The People, The Society, Arts and Leisure, The Economy, and Canada in the World.**

Eminent Canadians such as astronaut Roberta Bondar, former hockey star Jean Béliveau, and writer W.O. Mitchell have contributed their personal visions of Canada.

**Canada: A Portrait** is a beautiful illustration of the Canada of today.

Presented in a 30 cm X 23 cm (12 1/4" X 9") format, prestige hardcover, with over 200 pages, **Canada: A Portrait** (Catalogue No. 11-403E) is available in Canada for \$38.00 plus GST, US \$41.95 in the United States, and US \$48.95 in other countries.

To order write **Statistics Canada, Publications Sales, Ottawa, Ontario, K1A 0T6** or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. For faster ordering call toll-free **1-800-267-6677** and use your VISA and MasterCard or fax your order to **(613) 951-1584**.

Le Canada est un pays qui défie l'imagination. Imaginez un pays où les Terre-Neuviens vivent plus près des Africains que de leurs compatriotes de la Colombie-Britannique. Un pays où se trouve une île sur laquelle s'étend un glacier plus grand que l'Irlande. Imaginez un pays qui compte 2 millions de lacs et le plus long littoral du monde, et pourtant un seul voisin.

Statistique Canada a créé la 54<sup>e</sup> édition d'**Un portrait du Canada** pour célébrer la grandeur de notre pays. C'est à partir du riche éventail de données nationales de Statistique Canada que l'on a brossé ce tableau de notre situation sociale, économique, culturelle et politique.

Plus de 60 magnifiques photos, mariées à un texte vivant, offrent une vision claire et détaillée de ce qu'est le Canada d'aujourd'hui.

Découvrez les splendides régions naturelles de ce pays, de même que son paysage humain des plus diversifiés, à travers six chapitres intitulés :

**Le territoire, La population, La société, Les arts et les loisirs, L'économie et Le Canada dans le monde.**

D'éminents Canadiens, tels Roberta Bondar, astronaute, Jean Béliveau, ancienne vedette de hockey, et W.O. Mitchell, écrivain, y font part de leur vision personnelle du Canada.

**Un portrait du Canada...** un magnifique ouvrage de collection qui décrit admirablement bien le Canada d'aujourd'hui.

Présenté dans un format de 30 cm sur 23 cm (12,25 po X 9 po), dans une couverture rigide de luxe et en plus de 200 pages, **Un portrait du Canada** (N° 11-403F au catalogue) coûte 38 \$ plus TPS au Canada, 41,95 \$ US aux États-Unis et 48,95 \$ US dans les autres pays.

Pour commander, écrivez à **Statistique Canada, Vente des publications, Ottawa (Ontario), K1A 0T6** ou communiquez avec le Centre régional de consultation de Statistique Canada le plus proche. La liste figure dans la publication. Pour commander plus rapidement, composez sans frais le **1-800-267-6677** et utilisez votre carte VISA ou MasterCard ou télécopiez votre commande au **(613) 951-1584**.

## For and About Businesses Serving the Business of Canada...

At last, current data and expert analysis on this VITAL sector in one publication!

**T**he services sector now dominates the industrial economies of the world. Telecommunications, banking, advertising, computers, real estate, engineering and insurance represent an eclectic range of services on which all other economic sectors rely.

Despite their critical economic role, however, it has been hard to find out what's happening in these industries. Extensive and time-consuming efforts have, at best, provided a collection of diverse bits and pieces of information... an incomplete basis for informed understanding and effective action.

Now, instead of this fragmented picture, **Services Indicators** brings you a cohesive whole. An innovative quarterly from Statistics Canada, this publication **breaks new ground**, providing timely updates on performance and developments in:

- Communications
- Finance, Insurance and Real Estate
- Business Services

**Services Indicators** brings together analytical tables, charts, graphs and commentary in a stimulating and inviting format. From a wide range of key financial indicators including profits, equity, revenues, assets and liabilities, to trends and analysis of employment, salaries and output – PLUS a probing feature article in every issue, **Services Indicators** gives you the complete picture for the first time!

Finally, anyone with a vested interest in the services economy can go to **Services Indicators** for current information on these industries... both at-a-glance and in more detail than has ever been available before – all in one unique publication.

If your business is serving business in Canada, or if you are involved in financing, supplying, assessing or actually using these services, **Services Indicators** is a turning point – an opportunity to forge into the future armed with the most current insights and knowledge.

Order YOUR subscription to **Services Indicators** today!

**Services Indicators** (catalogue no. 63-0160XPB) is \$112 (plus 7% GST) in Canada, US\$135 in the United States and US\$157 in other countries.

To order, write to Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call 1-800-267-6677 toll-free in Canada and the United States [1-613-951-7277 elsewhere] and charge to your VISA or MasterCard.

## Au sujet des entreprises au service des affaires du Canada et à leur intention...

Enfin regroupées en une publication, des données courantes et des analyses éclairées sur ce secteur ESSENTIEL!

**L**e secteur des services domine à l'heure actuelle les économies industrielles du monde. Les télécommunications, les opérations bancaires, la publicité, l'informatique, l'immobilier, le génie et l'assurance représentent une gamme éclectique de services sur lesquels reposent tous les autres secteurs économiques.

En dépit de leur rôle critique sur le plan économique, il est toutefois difficile de savoir ce qui se passe dans ces branches d'activité. Des efforts considérables et fastidieux ont permis, au mieux, de rassembler une collection de renseignements fragmentaires divers... qui ne favorisent pas la compréhension avisée et la prise de mesures efficaces.

Remplacez maintenant ce tableau fragmentaire par l'image cohérente que vous offre **Indicateurs des services**. Cette publication trimestrielle innovatrice de Statistique Canada **pénètre dans un domaine inexploré**, fournissant des aperçus opportuns du rendement et des progrès dans les domaines suivants :

- Communications
- Finance, assurance et immobilier
- Services aux entreprises

**Indicateurs des services** rassemble des tableaux analytiques, des diagrammes, des graphiques et des observations en un mode de présentation stimulant et attrayant. En puisant à même une vaste gamme d'indicateurs financiers importants, allant notamment des profits, des capitaux propres, des recettes, de l'actif et du passif aux tendances et analyses de l'emploi, des salaires et de l'extrant – à laquelle s'ajoute un article de fond exploratif dans chaque numéro, **Indicateurs des services** brosse pour la première fois un tableau complet!

Enfin, quiconque s'intéresse au secteur des services peut consulter **Indicateurs des services** pour trouver des renseignements courants sur ces branches d'activité... tant sous une forme sommaire qu'à un niveau de détail n'ayant jamais encore été offert – et ce, dans une même publication.

Si vous êtes de ceux qui fournissent des services aux entreprises canadiennes, ou si vous financez, fournissez ou évaluez ces services ou y avez en fait recours, **Indicateurs des services** représente un tournant – une chance de s'aventurer dans l'avenir en étant armé des réflexions et connaissances les plus actuelles.

Commandez dès aujourd'hui VOTRE abonnement à **Indicateurs des services**!

**Indicateurs des services** (n° 63-0160XPB au catalogue) coûte 112 \$ (plus 7 % de TPS) au Canada, 135 \$ US aux États-Unis et 157 \$ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous préférez, vous pouvez télécopier votre commande en composant le 1-613-951-1584 ou téléphoner sans frais du Canada et des États-Unis au 1-800-267-6677 (ou d'ailleurs, au 1-613-951-7277) et porter les frais à votre compte VISA ou MasterCard.

## Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinarolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Sous-section du service à la clientèle  
Division des prix,

## Note of Appreciation

*Canada owes the success of its statistical system to  
a long-standing cooperation involving Statistics  
Canada, the citizens of Canada, its businesses,  
governments and other institutions. Accurate and  
timely statistical information could not be produced  
without their continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose  
sur un partenariat bien établi entre Statistique Canada  
et la population, les entreprises, les administrations  
canadiennes et les autres organismes. Sans cette  
collaboration et cette bonne volonté, il serait impossible  
de produire des statistiques précises et actuelles.*

### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613)951-8200.

® Registered Trade Mark of Statistics Canada.

### Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division.
- **François Bordé**, Chief, Goods & Services Producing Industries Section.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6, ou téléphonez à (613)951-8200.

® Marque déposée de Statistique Canada.

### Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix.
- **François Bordé**, Chef, Section des Industries de biens et de services.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48 - 1984.

## Highlights

### Second quarter 1995

#### Farm Input Price Index (FIPI)

#### Fertilizer and interest drive the second quarter farm input prices up

Prices of farm inputs increased 1.3% in the second quarter as the farm input price index rose to 122.3. In other words, farmers had to pay, on average, \$22.30 more in the second quarter 1995 than during 1986 (the base year of the index). Prices rose for almost all input groups; the exceptions were hired farm labour and inputs to animal production. The most significant increases were in the cost of interest and inputs to crop production. The year-to-year change in the total index was +3.6%.

#### Cost of borrowing was up

The interest index was 6.4% higher in the second quarter, mainly due to a sizable jump in the non-mortgage group, which rose almost 9%. The main factor was a rise in the interest rate. The non-mortgage index was over 40% higher than a year ago, pushing the overall cost of borrowing up almost 30%.

#### Lower world fertilizer supply pushes prices up

Crop production inputs were on average 8.5% higher, mainly due to a 16% rise in fertilizer prices. According to press releases, Russia and other countries of the former Soviet Union closed a number of their fertilizer plants, reducing global supplies. Their trading partners, including China, have raised their demand for fertilizer, which has translated into higher world prices. In the second quarter 1995, fertilizer was almost 25% more expensive, and nitrogen over 32% more expensive, than in the same quarter of 1994.

#### Prices in Western Canada grew faster than in the East

West from Ontario, the prices were up 1.7%. East of Manitoba, the quarterly price increase was about half of that, at 0.8%. The larger price increases in the West were entirely due to higher fertilizer prices, and occurred despite sizable decreases in western animal production prices. The cost of hired farm labour apparently decreased more in the East than in the West. However, the movement in farm wages is seasonal, and a year-to-year comparison is more appropriate. On an annual basis, farm wages in the Western provinces rose while they were down in the East.

## Faits saillants

### Deuxième trimestre de 1995

#### Indice des prix des entrées dans l'agriculture (IPEA)

#### Les engrais et l'intérêt font grimper les prix des entrées dans l'agriculture au deuxième trimestre

Au deuxième trimestre, les prix des entrées dans l'agriculture ont augmenté de 1,3% et l'indice total s'est établi à 122,3. Cela signifie que les prix payés par les agriculteurs au deuxième trimestre de 1995 dépassaient en moyenne de 22,30\$ ceux de l'année de base 1986. Des hausses de prix ont été observées dans presque tous les groupes d'entrées, sauf la main-d'œuvre agricole salariée et l'élevage d'animaux. L'intérêt et les cultures agricoles ont le plus augmenté. D'une année à l'autre, l'indice total a progressé de +3,6%.

#### Hausse du coût des emprunts

L'indice des intérêts a progressé de 6,4% au deuxième trimestre, en raison surtout du groupe des autres intérêts, qui a fait un bond de près de 9%. Le principal facteur en cause a été le relèvement du taux d'intérêt. L'indice des autres intérêts dépasse maintenant de plus de 40% son niveau d'il y a un an, ce qui a fait augmenter le coût global des emprunts de près de 30%.

#### Majoration des engrais due à la baisse des stocks mondiaux

Les entrées dans les cultures agricoles sont en hausse de 8,5% en moyenne par rapport au trimestre précédent en raison principalement d'une augmentation de 16% des prix des engrais. Selon les communiqués, la Russie et d'autres pays de l'ancienne Union soviétique ont fermé un certain nombre de leurs usines d'engrais, ce qui a réduit par le fait même l'offre mondiale. Les partenaires commerciaux de ces pays, dont la Chine, ont accru leur demande d'engrais. Cela a évidemment fait monter les prix mondiaux. Au deuxième trimestre de 1995, le prix de tous les engrais était supérieur de près de 25% à ce qu'il était au trimestre correspondant de 1994, le prix de l'azote ayant progressé de plus de 32% au cours de cette période.

#### Augmentation plus rapide des prix dans l'Ouest canadien que dans l'Est

À l'ouest de l'Ontario, les prix étaient en hausse de 1,7%, alors qu'à l'est du Manitoba, l'augmentation trimestrielle des prix était environ deux fois moins élevée, soit 0,8%. Un tel écart est dû uniquement aux prix plus élevés des engrais dans l'Ouest et s'observe malgré l'effet modérateur d'une diminution proportionnellement plus importante des prix de l'élevage d'animaux dans l'Ouest. Il semble que les coûts de la main-d'œuvre agricole salariée aient baissé davantage dans l'Est que dans l'Ouest. Le mouvement des salaires agricoles est toutefois de nature saisonnière et une comparaison d'une année à l'autre est plus révélatrice. Sur une base annuelle, les salaires agricoles sont en hausse dans les provinces de l'Ouest et en baisse dans l'Est.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. d'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years. (2) Selected items. (3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II. (4) In cases where a commodity has two Dnumbers, the top number is the old Dnumber which is terminated as of first quarter 1994, and the bottom number is the newly assigned number to be used from now on.

(1) The indexes are subject to a two-stage revision. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

## TECHNICAL NOTES

## FARM INPUT PRICE INDEX (1986 = 100)

## 1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

## Index formula

A general formula for an index made up of several items for the current period ( $t_0$ ) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

## NOTES TECHNIQUES

## INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986 = 100)

## 1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

## Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ( $I_{t/0}$ ) est la suivante:

where  $p_t$  is the price of an item in the current period, and  $p_o$ ,  $q_o$  and  $p_o q_o$  are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

$$I_{t/o} = \sum (p_t / p_o) w$$

where

où

$$W = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item - its percentage share in the total expenditure in the base period for all items in the index of which it is part.

### Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

### Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

où  $p_t$  est le prix de l'article au cours de la période courante,  $p_o$ ,  $q_o$  et  $p_o q_o$  représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

Exprimé de cette façon, "w" est le poids en pourcentage d'un article - soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

### Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

### Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

### Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

### Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue No. 11-001) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

### Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

### Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

### Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001 au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

### Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

### For further information

For data only, please contact the information unit at 613-951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at 613-951-3342. The addresses are on the inside front cover of this book.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

### Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613-951-3350) ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au 613-951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

(1) As of August 1992, current initial prices are used for wheat and barley in Western Canada.

(1) À partir du mois d'août 1992, les prix initiaux courants sont utilisés pour le blé et l'orge de l'ouest canadien.

## TECHNICAL NOTES

### FARM PRODUCT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

##### Definition and Coverage

The Farm Product Price Index (FPPI), formerly called Index Numbers of Farm Prices of Agricultural Products, measures the change through time in the prices received for agricultural commodities at the first transaction point.

The commodities included in the index are, for the most part, the same commodities that are estimated in the farm cash receipts series published in Agriculture Economic Statistics, Catalogue 21-603. From 1957 to date, the index is based upon products which account for about 95% of total farm cash receipts from farming operations for both the 1960-62 and 1971 weight base period. For years prior to 1957, the index was based upon products which accounted for about 90% of total cash receipts.

Users should note that Newfoundland was not included in the index prior to 1981. As a result, a break in the Canada series occurs in 1981. Nevertheless, Newfoundland's agricultural production is relatively small and the break is not significant.

##### Data Description and Sources

Much of the price information used in compiling the index is obtained from a monthly survey of farm respondents throughout Canada. Where possible, administrative data are used as price sources in order to reduce response burden. The prices used in computing the index are, as closely as can be determined, the transaction prices received by farmers when ownership first changes hands. These prices include any bonuses and premiums which can be attributed to specific commodities, but they exclude any storage, transportation, processing and handling charges which are deducted before the farmer is paid.

In reporting prices each month, survey respondents are asked to report the average prices prevailing in their neighbourhood, taking into account the various grades of each commodity marketed. Thus, average prices reported by these respondents may differ from month to month as a result of changes in price, changes in quality, or a combination of both. In effect, this index is not a measure of pure price change but a measure of the change in the return to farmers per unit of product marketed.

No adjustment for seasonal variation of prices has been made in the index. Also, the series is subject to revision as more complete and up-to-date data become available. This accounts for any changes between the indexes published in earlier reports and those appearing in the current publication.

## NOTES TECHNIQUES

### INDICE DES PRIX DES PRODUITS AGRICOLES (1986 = 100)

#### 1. Concepts, description des données et méthodes

##### Définition et champ d'observation

L'indice des prix des produits agricoles (IPPA), qui était auparavant appelé les nombres-indices des prix à la ferme des produits agricoles, mesure la variation des prix reçus pour les produits agricoles au premier point de transaction.

Les produits figurant dans l'indice sont, à quelques exceptions près, les mêmes que ceux qui figurent dans la série sur les recettes monétaires agricoles publiée dans le bulletin Statistique économiques agricoles, n° 21-603 au catalogue. Pour la période de 1957 à date, l'indice est basé sur les produits qui représentent environ 95% des recettes globales en espèces touchées au cours de la période de base pondérée 1960-62 et 1971. Avant 1957 inclusivement, l'indice était basé sur les prix des produits représentant environ 90% des recettes globales en espèces des cultivateurs.

Comme les chiffres de Terre-Neuve ont été pris en compte dans l'indice en 1981, il se produit une solution de continuité dans la série du Canada à ce moment-là. Cependant, comme la production agricole de cette province n'est pas considérable, cette solution de continuité n'est pas importante.

##### Description et sources des données

La plupart des renseignements sur les prix utilisés pour la confection de l'indice proviennent des rapports mensuels produits par des correspondants agricoles dans tout le Canada. Les prix utilisés pour calculer l'indice se rapprochent, dans la mesure du possible, des prix obtenus par les agriculteurs au moment de la transaction, lorsque le titre de propriété change de mains pour la première fois. Ces prix comprennent les suppléments et les primes qu'il est possible de rattacher à des produits particuliers, mais non les frais d'entreposage, de transport, de traitement et de manutention qui sont défalqués avant que l'agriculteur ne soit payé.

Au moment du rapport mensuel sur les prix, on demande aux correspondants d'indiquer la moyenne des prix en vigueur dans leur voisinage, en tenant compte des diverses qualités de chacun des produits sur le marché. Ainsi, les prix moyens déclarés par ces correspondants peuvent varier d'un mois à l'autre en raison des modifications de prix, des variations de la qualité offerte, ou d'une combinaison de ces deux éléments. En réalité, cet indice ne constitue pas une mesure de la simple variation de prix mais une mesure des variations des recettes des cultivateurs par unité de produit mis en vente.

Aucune rectification de prix n'a été faite pour tenir compte des variations saisonnières. Les séries peuvent subir des modifications à mesure que des données plus détaillées et plus à jour nous parviennent. Ces modifications expliquent les variations existant entre les indices publiés dans les bulletins précédents et les indices figurant dans le présent bulletin.

## Weights and Linking

As of March 1990, the index was rebased to 1986=100. The weighting period of 1981-1984 has been maintained, and the commodities included in the index remain unchanged from those included in the 1981=100 index.

When the index was rebased to 1981=100 in December 1986, certain new commodities were added and several old commodities were disaggregated so that more narrowly defined price movements could be followed. Also, with this rebasing, Newfoundland was included in the index beginning in January 1981.

The present index has four weighting periods for approximately 40 years of data. The index has been completely rebased in terms of time, weight, and coverage about every ten years. This ensures that the quantity weights reflect current production patterns. The multi-year weighting period used in the current index provides more representative weights than a single year weighting period. As noted above, the most recent rebasing was in terms of base time period only, as the weighting period and coverage are considered to still be representative of current production patterns.

This index was first published in August 1946 with a time and weight base of 1935-1939=100. In September 1969, the weight base was changed to 1960-1962=100 and the time base to 1961=100. In August 1978, the index was rebased with the time and weight base for the index of 1971=100. In December 1986, the index was rebased with a time base of 1981=100, and a weight base of 1981-1984. In March 1990, the index was again rebased with a time base of 1986=100, and the weight base was unchanged at 1981-1984=100. In each case, a Laspeyres' type (base-weighted) formula was used in calculating the index. Thus, The index expresses current farm prices as a percentage of prices prevailing in the base period.

To provide a measure of continuity, an annual series of linked index numbers on a 1986=100 base is available from 1950 to date. The monthly index has been recalculated using a 1986 time base as far back as January 1981. Annual indexes from 1950 to 1980 are linked to the current time base at January 1981.

## Data Availability

Data in this publication are also available on CANSIM Matrix 176. Additional indexes and weighting diagrams are available by contacting the Farm Income and Prices Section, as are the prices used in the calculation of the index.

## Pondérations et enchaînement

Depuis mars 1990, la base de l'indice a changé et est maintenant 1986=100. La période de pondération de 1981 à 1984 a été maintenue et les produits compris dans l'indice demeurent les mêmes que ceux de l'indice 1981=100.

Lorsque la base de l'indice est passé à 1981=100 en décembre 1986, quelques nouveaux produits ont été ajoutés et un certain nombre d'anciens produits ont été désagrégés pour permettre de suivre de façon plus précise la variation des prix. De plus, ce changement de base a permis d'inclure Terre-Neuve à partir de janvier 1981.

Le présent indice a quatre périodes de pondération et des données s'échelonnant sur 40 ans. Un changement complet de la base de l'indice (période, pondération et champ) a été effectué tous les 10 ans. Les coefficients de pondération des quantités reflètent bien ainsi les tendances de la production. La période de pondération comptant plusieurs années qui est utilisée pour l'indice actuel donne des coefficients de pondération plus représentatifs qu'une période de pondération ne comptant qu'une seule année. Comme il a été indiqué ci-dessus, le changement de base le plus récent concerne la période de base seulement car il est considéré que la période de pondération et le champ demeurent représentatifs des tendances actuelles de production.

L'indice a été publié pour la première fois en août 1946 sur la base temporelle et pondérée de 1935-1939=100. En septembre 1969, une nouvelle base pondérée a été établie, 1960-1962=100, la base temporelle étant 1961=100. En août 1978, la base de l'indice a été changée, la base temporelle et la base pondérée étant fixées à 1971=100. En décembre 1986, la base temporelle devient 1981=100 et la base pondérée 1981-1984. En mars 1990, la base de l'indice est changée, la base temporelle devenant 1986=100 et la base pondérée demeurant inchangée à 1981-1984=100. Dans chaque cas, la formule de Laspeyre a été utilisée pour le calcul de l'indice. L'indice ainsi produit représente les prix agricoles en cours, en termes de pourcentage des prix en vigueur pendant la période de référence.

Pour assurer une certaine continuité, une série annuelle d'indices raccordés à la base de 1986=100 est disponible pour la période allant de 1950 à ce jour. L'indice mensuel a été calculé de nouveau sur la base de 1986 jusqu'en janvier 1981. Les indices annuels de 1950 à 1980 sont raccordés à la base temporelle actuelle de janvier 1981.

## Données disponibles

Les données de la présente publication sont aussi disponibles sur CANSIM dans la matrice 176. Les indices additionnels, les diagrammes de pondération et les prix utilisés dans le calcul de l'indice sont disponibles en s'adressant à la Section du revenu agricole et des prix à la production.

**MODALITÉS DE PAIEMENT:**

Canada

- ✓ **Identify Emerging Trends**
- ✓ **Define New Markets**
- ✓ **Pinpoint Profit Opportunities**

- ✓ **Dégagez les nouvelles tendances**
- ✓ **Définissez les nouveaux marchés**
- ✓ **Déterminez les possibilités de profit**

**T**o safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the **Market Research Handbook** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- ▶ how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
  - ▶ the level of sales in retail chain and department stores;
  - ▶ what goods are being traded between Canada, U.S., and other countries;
  - ▶ census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration
- ...and much, much more!

With over 600 pages, the **Handbook** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the **Market Research Handbook** (Catalogue #63-2240XPB) today for only \$110 in Canada plus \$7.70 GST, US\$132 in the United States, and US\$154 in other countries.

**CALL TOLL-FREE 1-800-267-6677 OR FAX (613)951-1584** and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

**P**our maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le **Recueil statistique des études de marché** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- ▶ les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
  - ▶ le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
  - ▶ les biens échangés entre le Canada, les É.-U. et d'autres pays;
  - ▶ les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale
- ...et bien plus encore!

Le **Recueil**, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du **Recueil statistique des études de marché** (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 \$ au Canada plus 7,70 \$ de TPS, 132 \$ US aux États-Unis et 154 \$ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard. **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.

# Hire our team of researchers for \$56 a year

# Notre équipe de chercheurs est à votre service pour 56 \$ par année

**S**ubscribing to *Perspectives on Labour and Income* is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But *Perspectives* is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analyzing the statistics to bring you simple, clear summaries of labour market and income trends.

Our team of experts brings you the latest labour and income data. Each quarterly issue provides:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research
- information on new surveys

As a special bonus, twice a year you will also receive *The Labour Market Review*, giving you timely analysis on labour market performance over the previous six months or year.

**And all for only \$56!**

Thousands of Canadian professionals turn to *Perspectives* to discover emerging trends in labour and income and to stay up to date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find *Perspectives* indispensable. GUARANTEED. If you aren't convinced after reading the first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to *Perspectives* today (Cat. No. 75-0010XPE).

## ORDER NOW!

For only \$56 (plus \$3.92 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US\$68 for U.S. customers and US\$80 for customers in other countries.

Fax your VISA or MasterCard order to: (613) 951-1584.

Call toll free: 1-800-267-6677. Or mail to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication.

**S'**abonner à *L'emploi et le revenu en perspective*, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les

tendances actuelles du marché du travail et des revenus.

Notre équipe de spécialistes met à votre disposition des données récentes sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez :

- des articles de fond sur l'emploi et le revenu
- plus de 50 indicateurs clés de l'emploi et du revenu
- un aperçu de la recherche en cours
- de l'information sur les nouvelles enquêtes

En prime, vous recevrez le *Bilan du marché du travail* deux fois l'an. Vous disposerez ainsi d'une analyse à jour de la situation du marché du travail pour les six derniers mois ou la dernière année.

**Tout cela pour 56 \$ seulement!**

Des milliers de professionnels au Canada consultent *Perspective* pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que *L'emploi et le revenu en perspective* deviendra pour vous un outil indispensable. C'EST GARANTI. Si vous n'êtes pas satisfait après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à *Perspective* (n° 75-0010XPF au cat.) dès aujourd'hui.

## ABONNEZ-VOUS DÈS MAINTENANT!

Pour 56 \$ seulement (TPS de 3,92 \$ en sus), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année). L'abonnement est de 68 \$ US aux États-Unis et de 80 \$ US dans les autres pays. Faites parvenir votre commande par télécopieur (VISA ou MasterCard) au (613) 951-1584, par téléphone (sans frais) au 1-800-267-6677, par courrier à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6. Ou communiquez avec le Centre de consultation de Statistique Canada le plus près. (Voir la liste dans la présente publication).

## Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services Unit,  
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 1-819-951-9606) or to the Statistics Canada Reference Centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)

### Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinaire et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

## Note of Appreciation

*Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.*

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- <sup>P</sup> preliminary figures.
- <sup>r</sup> revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

### Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division.
- **François Bordé**, Chief, Goods & Services Producing Industries Section.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.

- néant ou zéro.
- nombres infimes.
- <sup>P</sup> nombres provisoires.
- <sup>r</sup> nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6, ou téléphonez à (613)951-8200.

® Marque déposée de Statistique Canada.

### Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix.
- **François Bordé**, Chef, Section des Industries de biens et de services.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48 - 1984.

## Highlights

### Third quarter 1995

#### Farm Input Price Index (FIPi)

Interest costs and the price of fertilizer and pesticides boosted the annual increase in the cost of farming in the third quarter of 1995 to its highest level in over a year.

It cost farmers 4.2% more to do business in the third quarter of 1995 than it did during the same period a year earlier. That was the highest annual rate of increase since the second quarter 1994 (+4.4%). In Eastern Canada, prices were up 3.7%, while the hike in the West was 4.6%.

Farmers paid 21.8% more in interest costs in the third quarter of 1995 compared to a year earlier, but the annual change was down from +29% in the previous quarter. Interest costs fell between quarters (-0.7%) for the first time since the beginning of 1994, on the heels of a decline in both mortgage and non-mortgage loans.

#### Fertilizer, pesticide costs dogging farmers

Farmers paid more for inputs in seven of nine categories on a year-over-year basis, particularly for interest and crop production inputs, such as seed, fertilizer and pesticides (+12.3%).

Farm wages at the national level climbed 3.0%, while the cost of machinery and motor vehicles went up 4.7%. Lower feeder cattle prices contributed most to a 3.1% drop in animal prices since the third quarter of 1994.

On the other hand, farm input prices tended to be stable in the third quarter compared to the second, rising only 0.3%, the lowest quarterly rate of increase this year. Farmers paid more to hire farm labour (+3.8%). That was offset by the lower interest costs and a 1.9% decrease in the prices of building and fencing. Other input groups showed little or no change.

#### Third-quarter costs up in the East, steady in the West

Third-quarter costs rose 0.9% in Eastern Canada on the strength of higher farm labour costs, while they remained unchanged in the West.

Eastern farmers paid significantly higher wages on cattle, fruit and vegetable farms, following a quarterly drop of 5.1% in farm wages in the East in the second quarter. Farmers in Eastern Canada also enjoyed lower prices for building and fencing, and interest.

In the West, farmers paid slightly more for animal production, machinery and motor vehicles, and supplies and services. But costs dropped for building and fencing, interest, hired farm labour and crop production.

## Faits Saillants

### Troisième trimestre de 1995

#### Indice des prix des entrées dans l'agriculture (IPEA)

Les coûts d'intérêt et le prix des engrais et des pesticides ont porté à son plus haut niveau en plus d'un an l'augmentation annuelle du coût de l'exploitation agricole au troisième trimestre de 1995.

Au troisième trimestre de 1995, les agriculteurs ont eu des coûts d'exploitation de 4,2% supérieurs à ceux de la même période un an auparavant. C'est le plus fort taux annuel d'augmentation depuis le deuxième trimestre de 1994 (+4,4%). La hausse a été de 3,7% dans l'Est canadien, et de 4,6% dans l'Ouest.

Au troisième trimestre de 1995, les coûts d'intérêt pour les agriculteurs ont été supérieurs de 21,8% à ce qu'ils étaient un an plus tôt, mais cette variation annuelle était moindre qu'au trimestre précédent (+29%). Les coûts d'intérêt ont chuté d'un trimestre à l'autre (-0,7%) pour la première fois depuis le début de 1994, dans le sillage d'un recul des prêts hypothécaires et non hypothécaires.

#### Les coûts d'engrais et de pesticides: bête noire des agriculteurs

D'une année à l'autre, les agriculteurs ont subi des hausses de prix de leurs entrées dans sept des neuf catégories et particulièrement pour l'intérêt et les entrées dans les cultures agricoles, comme les semences, les engrais et les pesticides (+12,3%).

Les salaires agricoles au niveau national ont progressé de 3,0%, pendant que le coût des machines agricoles et des véhicules automobiles avançait de 4,7%. La diminution du prix des bovins d'engraissement a été le principal facteur d'un repli de 3,1% du prix des animaux depuis le troisième trimestre de 1994.

Par ailleurs, les prix des entrées dans l'agriculture ont eu tendance à être stables au troisième trimestre par rapport au deuxième, n'avançant que de 0,3%, ce qui constitue le taux trimestriel d'augmentation le plus faible cette année. Les agriculteurs ont dû déboursier davantage pour embaucher de la main-d'oeuvre agricole (+3,8%). Cette augmentation a été neutralisée par la diminution des coûts d'intérêt et un repli de 1,9% du prix des bâtiments et des clôtures. La variation dans les autres groupes d'entrées a été faible ou nulle.

#### Les coûts au troisième trimestre: augmentation dans l'Est, stabilité dans l'Ouest

Les coûts au troisième trimestre ont progressé de 0,9% dans l'Est canadien sous l'effet d'une hausse des coûts de la main-d'oeuvre agricole, pendant qu'ils demeuraient inchangés dans l'Ouest.

Les agriculteurs de l'Est ont payé des salaires sensiblement supérieurs dans les fermes bovines, fruitières et maraîchères, après un recul trimestriel de 5,1% des salaires agricoles dans l'Est au deuxième trimestre. Les agriculteurs de l'Est canadien ont aussi profité d'une diminution de prix pour les bâtiments et les clôtures et l'intérêt.

Dans l'Ouest, les agriculteurs ont payé un peu plus cher pour l'élevage d'animaux, les machines agricoles et les véhicules automobiles, ainsi que les fournitures et les services, mais les coûts ont chuté pour les bâtiments et les clôtures, l'intérêt, la main-d'oeuvre agricole salariée et les cultures agricoles.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. d'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years. (2) Selected items. (3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II. (4) In cases where a commodity has two D numbers, the top number is the old D number which is terminated as of first quarter 1994, and the bottom number is the newly assigned number to be used from now on.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre. (2) Certains items. (3) Les groupes et sous-groupes de produits sont identifiés par le type de caractères d'imprimerie et par l'espacement. Pour plus d'explications, veuillez voir les appendices I ou II. (4) Dans les cas, où un produit a deux numéros D de banque de données, le numéro du dessus est l'ancien numéro D qui a été discontinué au premier trimestre de 1994, alors que le numéro du dessous est le nouveau numéro assigné qui est utilisé à partir de maintenant.

(1) The indexes are subject to a two-stage revision. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

## TECHNICAL NOTES

## FARM INPUT PRICE INDEX (1986 = 100)

## 1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939 = 100 for the years 1913 to 1971.

## Index formula

A general formula for an index made up of several items for the current period ( $I_{t/0}$ ) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

## NOTES TECHNIQUES

## INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986 = 100)

## 1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

## Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ( $I_{t/0}$ ) est la suivante:

where  $p_t$  is the price of an item in the current period, and  $p_o$ ,  $q_o$  and  $p_o q_o$  are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

$$I_{t/o} = \sum (p_t / p_o) w$$

where

où

$$W = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item - its percentage share in the total expenditure in the base period for all items in the index of which it is part.

### Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

### Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

où  $p_t$  est le prix de l'article au cours de la période courante,  $p_o$ ,  $q_o$  et  $p_o q_o$  représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

Exprimé de cette façon, "w" est le poids en pourcentage d'un article - soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

### Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

### Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

## Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

## Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue No. 11-001) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

## Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

## Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

## Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001 au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

## Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

### For further information

For data only, please contact the information unit at 613-951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at 613-951-3342. The addresses are on the inside front cover of this book.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

### Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613-951-3350) ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au 613-951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

(1) As of August 1992, current initial prices are used for wheat and barley in Western Canada.

(1) À partir du mois d'août 1992, les prix initiaux courants sont utilisés pour le blé et l'orge de l'ouest canadien.

## TECHNICAL NOTES

### FARM PRODUCT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

##### Definition and Coverage

The Farm Product Price Index (FPPI), formerly called Index Numbers of Farm Prices of Agricultural Products, measures the change through time in the prices received for agricultural commodities at the first transaction point.

The commodities included in the index are, for the most part, the same commodities that are estimated in the farm cash receipts series published in Agriculture Economic Statistics, Catalogue 21-603. From 1957 to date, the index is based upon products which account for about 95% of total farm cash receipts from farming operations for both the 1960-62 and 1971 weight base period. For years prior to 1957, the index was based upon products which accounted for about 90% of total cash receipts.

Users should note that Newfoundland was not included in the index prior to 1981. As a result, a break in the Canada series occurs in 1981. Nevertheless, Newfoundland's agricultural production is relatively small and the break is not significant.

##### Data Description and Sources

Much of the price information used in compiling the index is obtained from a monthly survey of farm respondents throughout Canada. Where possible, administrative data are used as price sources in order to reduce response burden. The prices used in computing the index are, as closely as can be determined, the transaction prices received by farmers when ownership first changes hands. These prices include any bonuses and premiums which can be attributed to specific commodities, but they exclude any storage, transportation, processing and handling charges which are deducted before the farmer is paid.

In reporting prices each month, survey respondents are asked to report the average prices prevailing in their neighbourhood, taking into account the various grades of each commodity marketed. Thus, average prices reported by these respondents may differ from month to month as a result of changes in price, changes in quality, or a combination of both. In effect, this index is not a measure of pure price change but a measure of the change in the return to farmers per unit of product marketed.

No adjustment for seasonal variation of prices has been made in the index. Also, the series is subject to revision as more complete and up-to-date data become available. This accounts for any changes between the indexes published in earlier reports and those appearing in the current publication.

## NOTES TECHNIQUES

### INDICE DES PRIX DES PRODUITS AGRICOLES (1986 = 100)

#### 1. Concepts, description des données et méthodes

##### Définition et champ d'observation

L'indice des prix des produits agricoles (IPPA), qui était auparavant appelé les nombres-indices des prix à la ferme des produits agricoles, mesure la variation des prix reçus pour les produits agricoles au premier point de transaction.

Les produits figurant dans l'indice sont, à quelques exceptions près, les mêmes que ceux qui figurent dans la série sur les recettes monétaires agricoles publiée dans le bulletin Statistique économiques agricoles, n° 21-603 au catalogue. Pour la période de 1957 à date, l'indice est basé sur les produits qui représentent environ 95% des recettes globales en espèces touchées au cours de la période de base pondérée 1960-62 et 1971. Avant 1957 inclusivement, l'indice était basé sur les prix des produits représentant environ 90% des recettes globales en espèces des cultivateurs.

Comme les chiffres de Terre-Neuve ont été pris en compte dans l'indice en 1981, il se produit une solution de continuité dans la série du Canada à ce moment-là. Cependant, comme la production agricole de cette province n'est pas considérable, cette solution de continuité n'est pas importante.

##### Description et sources des données

La plupart des renseignements sur les prix utilisés pour la confection de l'indice proviennent des rapports mensuels produits par des correspondants agricoles dans tout le Canada. Les prix utilisés pour calculer l'indice se rapprochent, dans la mesure du possible, des prix obtenus par les agriculteurs au moment de la transaction, lorsque le titre de propriété change de mains pour la première fois. Ces prix comprennent les suppléments et les primes qu'il est possible de rattacher à des produits particuliers, mais non les frais d'entreposage, de transport, de traitement et de manutention qui sont défalqués avant que l'agriculteur ne soit payé.

Au moment du rapport mensuel sur les prix, on demande aux correspondants d'indiquer la moyenne des prix en vigueur dans leur voisinage, en tenant compte des diverses qualités de chacun des produits sur le marché. Ainsi, les prix moyens déclarés par ces correspondants peuvent varier d'un mois à l'autre en raison des modifications de prix, des variations de la qualité offerte, ou d'une combinaison de ces deux éléments. En réalité, cet indice ne constitue pas une mesure de la simple variation de prix mais une mesure des variations des recettes des cultivateurs par unité de produit mis en vente.

Aucune rectification de prix n'a été faite pour tenir compte des variations saisonnières. Les séries peuvent subir des modifications à mesure que des données plus détaillées et plus à jour nous parviennent. Ces modifications expliquent les variations existant entre les indices publiés dans les bulletins précédents et les indices figurant dans le présent bulletin.

## Weights and Linking

As of March 1990, the index was rebased to 1986=100. The weighting period of 1981-1984 has been maintained, and the commodities included in the index remain unchanged from those included in the 1981=100 index.

When the index was rebased to 1981=100 in December 1986, certain new commodities were added and several old commodities were disaggregated so that more narrowly defined price movements could be followed. Also, with this rebasing, Newfoundland was included in the index beginning in January 1981.

The present index has four weighting periods for approximately 40 years of data. The index has been completely rebased in terms of time, weight, and coverage about every ten years. This ensures that the quantity weights reflect current production patterns. The multi-year weighting period used in the current index provides more representative weights than a single year weighting period. As noted above, the most recent rebasing was in terms of base time period only, as the weighting period and coverage are considered to still be representative of current production patterns.

This index was first published in August 1946 with a time and weight base of 1935-1939=100. In September 1969, the weight base was changed to 1960-1962=100 and the time base to 1961=100. In August 1978, the index was rebased with the time and weight base for the index of 1971=100. In December 1986, the index was rebased with a time base of 1981=100, and a weight base of 1981-1984. In March 1990, the index was again rebased with a time base of 1986=100, and the weight base was unchanged at 1981-1984=100. In each case, a Laspeyres' type (base-weighted) formula was used in calculating the index. Thus, The index expresses current farm prices as a percentage of prices prevailing in the base period.

To provide a measure of continuity, an annual series of linked index numbers on a 1986=100 base is available from 1950 to date. The monthly index has been recalculated using a 1986 time base as far back as January 1981. Annual indexes from 1950 to 1980 are linked to the current time base at January 1981.

## Data Availability

Data in this publication are also available on CANSIM Matrix 176. Additional indexes and weighting diagrams are available by contacting the Farm Income and Prices Section, as are the prices used in the calculation of the index.

## Pondérations et enchaînement

Depuis mars 1990, la base de l'indice a changé et est maintenant 1986=100. La période de pondération de 1981 à 1984 a été maintenue et les produits compris dans l'indice demeurent les mêmes que ceux de l'indice 1981=100.

Lorsque la base de l'indice est passé à 1981=100 en décembre 1986, quelques nouveaux produits ont été ajoutés et un certain nombre d'anciens produits ont été désagrégés pour permettre de suivre de façon plus précise la variation des prix. De plus, ce changement de base a permis d'inclure Terre-Neuve à partir de janvier 1981.

Le présent indice a quatre périodes de pondération et des données s'échelonnant sur 40 ans. Un changement complet de la base de l'indice (période, pondération et champ) a été effectué tous les 10 ans. Les coefficients de pondération des quantités reflètent bien ainsi les tendances de la production. La période de pondération comptant plusieurs années qui est utilisée pour l'indice actuel donne des coefficients de pondération plus représentatifs qu'une période de pondération ne comptant qu'une seule année. Comme il a été indiqué ci-dessus, le changement de base le plus récent concerne la période de base seulement car il est considéré que la période de pondération et le champ demeurent représentatifs des tendances actuelles de production.

L'indice a été publié pour la première fois en août 1946 sur la base temporelle et pondérée de 1935-1939=100. En septembre 1969, une nouvelle base pondérée a été établie, 1960-1962=100, la base temporelle étant 1961=100. En août 1978, la base de l'indice a été changée, la base temporelle et la base pondérée étant fixées à 1971=100. En décembre 1986, la base temporelle devient 1981=100 et la base pondérée 1981-1984. En mars 1990, la base de l'indice est changée, la base temporelle devenant 1986=100 et la base pondérée demeurant inchangée à 1981-1984=100. Dans chaque cas, la formule de Laspeyre a été utilisée pour le calcul de l'indice. L'indice ainsi produit représente les prix agricoles en cours, en termes de pourcentage des prix en vigueur pendant la période de référence.

Pour assurer une certaine continuité, une série annuelle d'indices raccordés à la base de 1986=100 est disponible pour la période allant de 1950 à ce jour. L'indice mensuel a été calculé de nouveau sur la base de 1986 jusqu'en janvier 1981. Les indices annuels de 1950 à 1980 sont raccordés à la base temporelle actuelle de janvier 1981.

## Données disponibles

Les données de la présente publication sont aussi disponibles sur CANSIM dans la matrice 176. Les indices additionnels, les diagrammes de pondération et les prix utilisés dans le calcul de l'indice sont disponibles en s'adressant à la Section du revenu agricole et des prix à la production.

✓ **Identify  
Emerging Trends**

✓ **Define New  
Markets**

✓ **Pinpoint Profit  
Opportunities**

✓ **Dégagez les  
nouvelles tendances**

✓ **Définissez les  
nouveaux marchés**

✓ **Déterminez les  
possibilités de profit**

**T**o safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the *Market Research Handbook* gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- ▶ how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
  - ▶ the level of sales in retail chain and department stores;
  - ▶ what goods are being traded between Canada, U.S., and other countries;
  - ▶ census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration
- ...and much, much more!

With over 600 pages, the *Handbook* includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the *Market Research Handbook* (Catalogue #63-2240XPB) today for only \$110 in Canada plus \$7.70 GST, US\$132 in the United States, and US\$154 in other countries.

**CALL TOLL-FREE 1-800-267-6677 OR FAX (613)951-1584** and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

**P**our maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le *Recueil statistique des études de marché* brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- ▶ les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
  - ▶ le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
  - ▶ les biens échangés entre le Canada, les É.-U. et d'autres pays;
  - ▶ les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale
- ...et bien plus encore!

Le *Recueil*, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du *Recueil statistique des études de marché* (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 \$ au Canada plus 7,70 \$ de TPS, 132 \$ US aux États-Unis et 154 \$ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.

*Don't let the changing world  
take you by surprise!*

*Ne soyez pas dépassé  
par les événements!*

**An aging population. Lone-parent families. A diverse labour force. Do you know how today's social changes will affect your future ... your organization ... and your family?**

**Keep pace with the dramatic shifts in Canada's evolving social fabric with Statistic Canada's best-selling quarterly, *Canadian Social Trends*. With vast and varied reports on major changes in key social issues and trends, this periodical incorporates findings from over 50 national surveys.**

**Written by some of Canada's leading-edge social analysts, *Canadian Social Trends* combines painstaking research with dynamic prose on topics like ethnic diversity, low-income families, time-crunch stress, violent crime and much more — all in a colourful, easy-to-read, magazine format.**

***A lasting record of changing times!***

**Join the thousands of business and policy analysts, social-science professionals, and academics who trust *Canadian Social Trends* to demystify the causes and consequences of change in Canadian society. Don't miss a single issue — subscribe today.**

***Canadian Social Trends* (catalogue number 11-0080XPE) is \$34 annually in Canada, US\$41 in the United States and US\$48 in other countries.**

**Le vieillissement de la population. Les familles monoparentales. La diversification de la population active. Savez-vous comment les changements sociaux d'aujourd'hui vont se répercuter sur votre avenir, votre organisation, votre famille?**

**Suivez l'évolution spectaculaire de la société canadienne grâce à *Tendances sociales canadiennes*, une publication trimestrielle de Statistique Canada. Avec des articles vastes et variés sur les principaux changements caractérisant les questions et les tendances sociales principales, cette publication intègre les résultats de plus de 50 enquêtes nationales.**

**Certains des analystes sociaux les plus reconnus du Canada rédigent des articles dans *Tendances sociales canadiennes*. Ils présentent les résultats de recherches minutieuses dans un style attrayant pour des sujets tels que la diversité ethnique, les familles à faible revenu, le stress dû au manque de temps, le crime et bien d'autres encore dans une revue haute en couleur et de lecture aisée.**

***Un dossier permanent d'une époque en évolution!***

**Des milliers d'analystes des entreprises et des politiques, de professionnels des sciences sociales et d'universitaires lisent *Tendances sociales canadiennes* pour identifier les causes et les conséquences de l'évolution de la société canadienne. Ne manquez pas un numéro, abonnez-vous dès aujourd'hui.**

**L'abonnement annuel à *Tendances sociales canadiennes* (n° 11-0080XPF au catalogue) coûte 34 \$ au Canada, 41 \$ US aux États-Unis et 48 \$ US dans les autres pays.**

## Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services Unit,  
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 1-613-951-9606) or to the Statistics Canada Reference Centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Toll-free access is provided for all users who reside outside the local dialing area of any of the Regional Reference Centres.

### How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6.

(1-613-951-7277)  
Facsimile Number (1-613-951-1584)  
Toronto Credit Card Only (1-416-973-8018)

### Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolinguage et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Sous-section du service à la clientèle,  
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 1-613-951-9606) ou au Centre de consultation de Statistique Canada à:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Un service d'appel interurbain sans frais est offert à tous les utilisateurs qui habitent à l'extérieur des zones de communication locale des Centres régionaux de consultation.

## Note of Appreciation

*Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.*

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613)951-8200.

® Registered Trade Mark of Statistics Canada.

### Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division.
- **François Bordé**, Chief, Goods & Services Producing Industries Section.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6, ou téléphonez à (613)951-8200.

® Marque déposée de Statistique Canada.

### Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix.
- **François Bordé**, Chef, Section des Industries de biens et de services.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48 - 1984.

## Highlights

### Fourth quarter 1995

#### Farm input price index (FIPI)

It cost farmers almost 5% more to do business in the last three months of 1995 than it did during the same period a year earlier. This was the highest annual rate of increase since the third quarter of 1993, when it was 5.1%.

Farm input prices rose 4.9%, as farmers paid more for almost everything they needed. Interest costs and the price of fertilizer once again led the way.

Farmers faced a 15.0% hike on a year-over-year basis in the cost of borrowing due to higher costs for non-mortgage loans. However, more recent declines in the costs of mortgage and non-mortgage loans cut interest costs on a quarter-to-quarter basis. In fact, they dropped 2.1% between the third and fourth quarters of 1995, the second consecutive quarterly decrease.

Farmers paid more for fertilizers, twine, and seed, all of which raised the annual cost of crop production by 9.2% in the fourth quarter. Machinery and motor vehicle costs rose 4.1%. Increased feed costs helped push the annual cost of animal production up by 3.8%.

Eastern farmers faced stiffer cost increases over the year than did their Western counterparts.

#### Costs rose significantly higher for Eastern farmers

Prices in Eastern Canada rose 6.6% in the fourth quarter of 1995 compared with the fourth quarter of 1994. The hike in the West was a more moderate 3.7%.

Eastern farmers faced price increases in all seven input categories. Higher borrowing charges (+16.1%) and animal production costs, particularly for grain feed (+35.8%), contributed the most to the fourth quarter year-over-year increase.

In the West, farmers paid more for inputs in five of seven categories on a year-over-year basis. Higher costs for non-mortgage loans pushed up the interest component by 14.2%. The higher costs of fertilizers, twine and grain seed The higher costs of fertilizers, twine and grain seeds contributed significantly to the 10.1% crop production price hike. Farmers in the West also enjoyed lower costs for animal production inputs (-3.2%), due mostly to lower prices for cattle. Costs of building and fencing went down a marginal 0.7%.

#### Prices remained stable between third and fourth quarters

Nationally, farm inputs rose only a marginal 0.6% between the third and fourth quarters of 1995. Farmers paid more for animal production inputs (+2.5%) building and fencing (+1.3%), and machinery and motor vehicles (+1.1%). Farmers paid 2.7% less for crop production and enjoyed a 2.1% drop in the cost of interest. The other input categories showed little or no price changes.

## Faits Saillants

### Quatrième trimestre de 1995

#### Indice des prix des entrées dans l'agriculture (IPEA)

Dans les trois derniers mois de 1995, les agriculteurs ont subi une augmentation des coûts d'exploitation de près de 5% par rapport à la période correspondante de l'année précédente. C'est le plus fort taux annuel d'augmentation en plus de deux ans depuis le troisième trimestre de 1993, où elle se situait à 5,1%.

Les prix des entrées dans l'agriculture ont progressé de 4,9%, car les agriculteurs ont payé plus cher à peu près tout ce dont ils ont eu besoin. Cependant, les taux d'intérêt et le prix des engrais ont encore été les principaux facteurs de la progression.

Les agriculteurs ont eu à composer avec un bond, d'une année à l'autre, de 15,0% du coût des emprunts, à cause de l'augmentation des taux d'intérêt non hypothécaire. Cependant, des reculs plus récents du coût des emprunts hypothécaires et non hypothécaires ont réduit les coûts d'intérêt d'un trimestre à l'autre. Ces derniers ont fléchi de 2,1% entre le troisième et le quatrième trimestre de 1995, pour un deuxième repli consécutif.

Les agriculteurs ont payé plus cher les engrais, la ficelle, et les semences, autant de facteurs qui ont propulsé le coût annuel des cultures agricoles de 9,2% au quatrième trimestre. Le coût des machines et des véhicules automobiles a avancé de 4,1%, et la hausse du coût du fourrage a contribué à faire monter de 3,8% le coût annuel de l'élevage.

Les agriculteurs de l'Est ont dû faire face à des augmentations de coûts plus marquées que leur homologues de l'Ouest canadien.

#### Progression beaucoup plus forte des coûts pour les agriculteurs de l'Est

Dans l'Est canadien, les prix ont monté de 6,6% au quatrième trimestre de 1995 par rapport à la même période de 1994. Dans l'Ouest, on a observé une hausse plus modérée de 3,7%.

Les agriculteurs de l'Est ont subi des augmentations de prix dans chacune des sept catégories d'entrées. Les augmentations du coût des emprunts (+16,1%) et de l'élevage, et particulièrement des céréales fourragères (+35,8%), ont le plus contribué à la progression d'une année à l'autre au quatrième trimestre.

Dans l'Ouest, les agriculteurs ont payé leurs entrées de cinq des sept catégories plus cher en 1995 qu'en 1994. La hausse des coûts des emprunts non hypothécaires a propulsé de 14,2% le coût de l'intérêt. La montée des coûts des engrais, de la ficelle et des grains de semence a été un facteur important de l'avance des prix pour les cultures agricoles (+10,1%). Mais les agriculteurs de l'Ouest auront aussi profité d'une diminution des coûts des entrées dans l'élevage (-3,2%), à la faveur surtout d'une baisse du prix des bovins. Les coûts des bâtiments et des clôtures ont accusé un léger repli de 0,7%.

#### Stabilité des prix entre le troisième et le quatrième trimestre

À l'échelle nationale, les entrées dans l'agriculture n'ont connu qu'une légère progression de 0,6% entre le troisième et le quatrième trimestre de 1995. Les agriculteurs ont payé plus cher les entrées dans l'élevage (+2,5%), dans les bâtiments et les clôtures (+1,3%) et dans les machines agricoles et les véhicules automobiles (+1,1%). Les agriculteurs ont payé 2,7% de moins pour la production végétale et ils ont aussi profité d'une baisse de 2,1% du coût de l'intérêt. Les autres catégories n'ont affiché à peu près aucun changement.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. d'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years. (2) Selected items. (3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II. (4) In cases where a commodity has two Dnumbers, the top number is the old Dnumber which is terminated as of first quarter 1994, and the bottom number is the newly assigned number to be used from now on.

(1) The indexes are subject to a two-stage revision. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

## TECHNICAL NOTES

### FARM INPUT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939 = 100 for the years 1913 to 1971.

#### Index formula

A general formula for an index made up of several items for the current period ( $I_{t/0}$ ) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

## NOTES TECHNIQUES

### INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986 = 100)

#### 1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939 = 100, pour les années 1913 à 1971.

#### Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ( $I_{t/0}$ ) est la suivante:

where  $p_t$  is the price of an item in the current period, and  $p_o$ ,  $q_o$  and  $p_o q_o$  are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

$$I_{t/o} = \sum (p_t / p_o) w$$

where

où

$$W = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item - its percentage share in the total expenditure in the base period for all items in the index of which it is part.

### Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

### Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

où  $p_t$  est le prix de l'article au cours de la période courante,  $p_o$ ,  $q_o$  et  $p_o q_o$  représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

Exprimé de cette façon, "w" est le poids en pourcentage d'un article - soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

### Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

### Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'œuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

### Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

### Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue No. 11-001) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

### Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

### Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

### Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001 au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

### Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

### For further information

For data only, please contact the information unit at 613-951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at 613-951-3342. The addresses are on the inside front cover of this book.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

### Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613-951-3350) ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au 613-951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

(1) As of August 1992, current initial prices are used for wheat and barley in Western Canada.

(1) À partir du mois d'août 1992, les prix initiaux courants sont utilisés pour le blé et l'orge de l'ouest canadien.

## TECHNICAL NOTES

### FARM PRODUCT PRICE INDEX (1986 = 100)

#### 1. Concepts, Data Description and Methods

##### Definition and Coverage

The Farm Product Price Index (FPPI), formerly called Index Numbers of Farm Prices of Agricultural Products, measures the change through time in the prices received for agricultural commodities at the first transaction point.

The commodities included in the index are, for the most part, the same commodities that are estimated in the farm cash receipts series published in Agriculture Economic Statistics, Catalogue 21-603. From 1957 to date, the index is based upon products which account for about 95% of total farm cash receipts from farming operations for both the 1960-62 and 1971 weight base period. For years prior to 1957, the index was based upon products which accounted for about 90% of total cash receipts.

Users should note that Newfoundland was not included in the index prior to 1981. As a result, a break in the Canada series occurs in 1981. Nevertheless, Newfoundland's agricultural production is relatively small and the break is not significant.

##### Data Description and Sources

Much of the price information used in compiling the index is obtained from a monthly survey of farm respondents throughout Canada. Where possible, administrative data are used as price sources in order to reduce response burden. The prices used in computing the index are, as closely as can be determined, the transaction prices received by farmers when ownership first changes hands. These prices include any bonuses and premiums which can be attributed to specific commodities, but they exclude any storage, transportation, processing and handling charges which are deducted before the farmer is paid.

In reporting prices each month, survey respondents are asked to report the average prices prevailing in their neighbourhood, taking into account the various grades of each commodity marketed. Thus, average prices reported by these respondents may differ from month to month as a result of changes in price, changes in quality, or a combination of both. In effect, this index is not a measure of pure price change but a measure of the change in the return to farmers per unit of product marketed.

No adjustment for seasonal variation of prices has been made in the index. Also, the series is subject to revision as more complete and up-to-date data become available. This accounts for any changes between the indexes published in earlier reports and those appearing in the current publication.

## NOTES TECHNIQUES

### INDICE DES PRIX DES PRODUITS AGRICOLES (1986 = 100)

#### 1. Concepts, description des données et méthodes

##### Définition et champ d'observation

L'indice des prix des produits agricoles (IPPA), qui était auparavant appelé les nombres-indices des prix à la ferme des produits agricoles, mesure la variation des prix reçus pour les produits agricoles au premier point de transaction.

Les produits figurant dans l'indice sont, à quelques exceptions près, les mêmes que ceux qui figurent dans la série sur les recettes monétaires agricoles publiée dans le bulletin Statistique économiques agricoles, n° 21-603 au catalogue. Pour la période de 1957 à date, l'indice est basé sur les produits qui représentent environ 95% des recettes globales en espèces touchées au cours de la période de base pondérée 1960-62 et 1971. Avant 1957 inclusivement, l'indice était basé sur les prix des produits représentant environ 90% des recettes globales en espèces des cultivateurs.

Comme les chiffres de Terre-Neuve ont été pris en compte dans l'indice en 1981, il se produit une solution de continuité dans la série du Canada à ce moment-là. Cependant, comme la production agricole de cette province n'est pas considérable, cette solution de continuité n'est pas importante.

##### Description et sources des données

La plupart des renseignements sur les prix utilisés pour la confection de l'indice proviennent des rapports mensuels produits par des correspondants agricoles dans tout le Canada. Les prix utilisés pour calculer l'indice se rapprochent, dans la mesure du possible, des prix obtenus par les agriculteurs au moment de la transaction, lorsque le titre de propriété change de mains pour la première fois. Ces prix comprennent les suppléments et les primes qu'il est possible de rattacher à des produits particuliers, mais non les frais d'entreposage, de transport, de traitement et de manutention qui sont déduits avant que l'agriculteur ne soit payé.

Au moment du rapport mensuel sur les prix, on demande aux correspondants d'indiquer la moyenne des prix en vigueur dans leur voisinage, en tenant compte des diverses qualités de chacun des produits sur le marché. Ainsi, les prix moyens déclarés par ces correspondants peuvent varier d'un mois à l'autre en raison des modifications de prix, des variations de la qualité offerte, ou d'une combinaison de ces deux éléments. En réalité, cet indice ne constitue pas une mesure de la simple variation de prix mais une mesure des variations des recettes des cultivateurs par unité de produit mis en vente.

Aucune rectification de prix n'a été faite pour tenir compte des variations saisonnières. Les séries peuvent subir des modifications à mesure que des données plus détaillées et plus à jour nous parviennent. Ces modifications expliquent les variations existant entre les indices publiés dans les bulletins précédents et les indices figurant dans le présent bulletin.

## Weights and Linking

As of March 1990, the index was rebased to 1986=100. The weighting period of 1981-1984 has been maintained, and the commodities included in the index remain unchanged from those included in the 1981=100 index.

When the index was rebased to 1981=100 in December 1986, certain new commodities were added and several old commodities were disaggregated so that more narrowly defined price movements could be followed. Also, with this rebasing, Newfoundland was included in the index beginning in January 1981.

The present index has four weighting periods for approximately 40 years of data. The index has been completely rebased in terms of time, weight, and coverage about every ten years. This ensures that the quantity weights reflect current production patterns. The multi-year weighting period used in the current index provides more representative weights than a single year weighting period. As noted above, the most recent rebasing was in terms of base time period only, as the weighting period and coverage are considered to still be representative of current production patterns.

This index was first published in August 1946 with a time and weight base of 1935-1939=100. In September 1969, the weight base was changed to 1960-1962=100 and the time base to 1961=100. In August 1978, the index was rebased with the time and weight base for the index of 1971=100. In December 1986, the index was rebased with a time base of 1981=100, and a weight base of 1981-1984. In March 1990, the index was again rebased with a time base of 1986=100, and the weight base was unchanged at 1981-1984=100. In each case, a Laspeyres' type (base-weighted) formula was used in calculating the index. Thus, The index expresses current farm prices as a percentage of prices prevailing in the base period.

To provide a measure of continuity, an annual series of linked index numbers on a 1986=100 base is available from 1950 to date. The monthly index has been recalculated using a 1986 time base as far back as January 1981. Annual indexes from 1950 to 1980 are linked to the current time base at January 1981.

## Data Availability

Data in this publication are also available on CANSIM Matrix 176. Additional indexes and weighting diagrams are available by contacting the Farm Income and Prices Section, as are the prices used in the calculation of the index.

## Pondérations et enchaînement

Depuis mars 1990, la base de l'indice a changé et est maintenant 1986=100. La période de pondération de 1981 à 1984 a été maintenue et les produits compris dans l'indice demeurent les mêmes que ceux de l'indice 1981=100.

Lorsque la base de l'indice est passé à 1981=100 en décembre 1986, quelques nouveaux produits ont été ajoutés et un certain nombre d'anciens produits ont été désagrégés pour permettre de suivre de façon plus précise la variation des prix. De plus, ce changement de base a permis d'inclure Terre-Neuve à partir de janvier 1981.

Le présent indice a quatre périodes de pondération et des données s'échelonnant sur 40 ans. Un changement complet de la base de l'indice (période, pondération et champ) a été effectué tous les 10 ans. Les coefficients de pondération des quantités reflètent bien ainsi les tendances de la production. La période de pondération comptant plusieurs années qui est utilisée pour l'indice actuel donne des coefficients de pondération plus représentatifs qu'une période de pondération ne comptant qu'une seule année. Comme il a été indiqué ci-dessus, le changement de base le plus récent concerne la période de base seulement car il est considéré que la période de pondération et le champ demeurent représentatifs des tendances actuelles de production.

L'indice a été publié pour la première fois en août 1946 sur la base temporelle et pondérée de 1935-1939=100. En septembre 1969, une nouvelle base pondérée a été établie, 1960-1962=100, la base temporelle étant 1961=100. En août 1978, la base de l'indice a été changée, la base temporelle et la base pondérée étant fixées à 1971=100. En décembre 1986, la base temporelle devient 1981=100 et la base pondérée 1981-1984. En mars 1990, la base de l'indice est changée, la base temporelle devenant 1986=100 et la base pondérée demeurant inchangée à 1981-1984=100. Dans chaque cas, la formule de Laspeyre a été utilisée pour le calcul de l'indice. L'indice ainsi produit représente les prix agricoles en cours, en termes de pourcentage des prix en vigueur pendant la période de référence.

Pour assurer une certaine continuité, une série annuelle d'indices raccordés à la base de 1986=100 est disponible pour la période allant de 1950 à ce jour. L'indice mensuel a été calculé de nouveau sur la base de 1986 jusqu'en janvier 1981. Les indices annuels de 1950 à 1980 sont raccordés à la base temporelle actuelle de janvier 1981.

## Données disponibles

Les données de la présente publication sont aussi disponibles sur CANSIM dans la matrice 176. Les indices additionnels, les diagrammes de pondération et les prix utilisés dans le calcul de l'indice sont disponibles en s'adressant à la Section du revenu agricole et des prix à la production.

# Canada

# Women in Canada

## Two Decades of Change

**R**ecent decades have witnessed dramatic changes in the roles women play in Canadian society. There have been considerable improvements in the social and economic situation of women in the last two decades, however, gaps continue to exist between many leading socio-economic indicators for women and men. No other publication chronicles the changing status of women more clearly than **Women in Canada!**

This 180-page portrait examines a wide range of topics in women's lives including:

- housing
- income
- family status
- health
- education
- criminal victimization
- labour force characteristics

**In addition, the report presents separate sections on:**

- immigrant women
- women in visible minorities
- Aboriginal women
- women with disabilities

### More than just facts!

**Women in Canada** offers the most in-depth, accurate information available on women today. With its easy-to-read format, and over 200 charts and tables, you'll discover many essential facts about the changing status of women over the last two decades.

Being aware of the roles, status and lifestyles of Canadian women is essential for **planning and implementing appropriate social policies**, for **developing successful marketing strategies**, or for simply **gaining a better appreciation** of how Canadian society has changed.

**Women in Canada** (89-5030XPE, issue # 95001) is available in Canada for \$49 (plus PST & GST), US \$59 in the United States, and US \$69 in other countries.

### To order, write to

Statistics Canada, Operations and Integration Division,  
Circulation Management, Ottawa, Ontario K1A 0T6

or contact the nearest Statistics Canada Regional Office listed in this publication.

For faster service, fax your order to  
**1-613-951-1584** or call toll free **1-800-267-6677** and use your VISA or MasterCard.

# Femmes au Canada

## Deux décennies de changements profonds

**Au** cours des décennies récentes, les rôles que jouent les femmes dans la société ont subi des bouleversements profonds. La situation sociale et économique des femmes s'est améliorée

considérablement pendant les deux dernières décennies; cependant, il existe toujours un fossé entre les nombreux indicateurs sociaux et économiques qui s'appliquent aux hommes et aux femmes. Aucune autre publication ne retrace l'évolution des femmes aussi soigneusement que **Les femmes au Canada**.

Ce tout dernier rapport de 180 pages traite des divers aspects de la vie des femmes, notamment :

- les caractéristiques de la population active
- le revenu
- la famille
- la santé
- le logement
- l'éducation
- la victimisation

**De plus, ce rapport comporte des sections distinctes:**

- sur les immigrantes
- les membres de minorités visibles
- les femmes autochtones
- les femmes ayant une incapacité.

### Les faits... et encore plus!

**Les femmes au Canada** vous fournit l'information la plus détaillée et la plus exacte qui soit sur les femmes d'aujourd'hui. Ouvrage de lecture facile, il contient plus de 200 tableaux et graphiques sur les points clés de l'évolution des femmes au cours des deux dernières décennies.

Connaître les rôles, les situations et les modes de vie des femmes canadiennes constitue un élément essentiel pour ce qui est de la planification et la mise en oeuvre des politiques sociales opportunes, l'élaboration des stratégies efficaces de marketing, et la compréhension des transformations qui ont marqué la société canadienne.

**Les femmes au Canada** (numéro au catalogue 89-5030XPF, numéro de l'édition 95001) est disponible au coût de 49 \$ (TPS et TVP en sus) au Canada, 59 \$ US aux États-Unis et 69 \$ US dans les autres pays.

### Pour commander, veuillez écrire à

Statistique Canada, Division des opérations et intégration, Direction de la circulation, Ottawa (Ontario), K1A 0T6

ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

Pour un service plus rapide, commandez par télécopieur au **1-613-951-1584** ou composez sans frais le **1-800-267-6677** et utilisez votre carte VISA ou MasterCard.

# Canada: A Portrait

## A Memorable Journey Through Canada

A book to captivate everyone, **Canada: A Portrait** is a compelling record in words and pictures of the excitement and diversity of present-day Canada. This all-new edition of Statistics Canada's proven bestseller features a striking full-colour dustjacket reproduction of Sweetgrass, the rich impressionistic painting by Canadian artist Frank Mayrs. Once you open its appealing cover, you will discover that **Canada: A Portrait** not only delights the eye, it stimulates the imagination. Each page is brimming with lively and intriguing facts, bringing to life the personality and charisma of Canada in a clear, easy-to-read and entertaining narrative.

### From the important to the whimsical...

**Canada: A Portrait** presents you with the perfect opportunity to explore Canada at your leisure with just the turn of a page. Investigate the diverse regions of Canada from Mount Logan in the Yukon to the St. John River in New Brunswick. Delve into the heartbeat of Canada's society: Who are we? Where do we live? What do we believe in? See how the economy is evolving and what makes it tick. Learn about the activities enjoyed by today's Canadians, such as opera and hockey and home computers. **Canada: A Portrait** offers a complete examination of this unique country and reflects many interesting perspectives.

### The Land, The People, The Society, Arts and Leisure, The Economy and Canada in the World

Six chapters provide a guided tour of both the physical and the human landscape of Canada. Each chapter is enriched with personal insights on "being Canadian," shared with you by such eminent people as Myriam Bédard, Gerhard Herzberg and Joe Schlesinger and is adorned with a gallery of imaginative pictorial images.

### Share the Canada: A Portrait experience with your family, friends and colleagues

Its charming format, rich design, intriguing content and attractive price make this a keepsake volume, ideal both to give and to receive.

**Canada: A Portrait** is available for only \$39.95 in Canada (plus GST, applicable PST and shipping and handling), US \$51.95 in the United States and US \$59.95 in other countries. To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. Call toll-free: 1-800-700-1033 and use your Visa and MasterCard or fax your order to (613) 951-1584.

# Un portrait du Canada

## Un voyage mémorable à travers le Canada

**Un portrait du Canada** captivera tout le monde. C'est un recueil irrésistible, en mots et en images, de tout ce qui fait le dynamisme et la diversité du Canada d'aujourd'hui. Cette nouvelle édition de l'indiscutable best-seller de Statistique Canada offre, sur la jaquette, un magnifique paysage impressionniste, intitulé Sweetgrass, de l'artiste canadien Frank Mayrs. Dès la première page, vous serez fasciné par la beauté des images et du texte et vous laisserez vagabonder votre imagination. Chaque page regorge de faits vivants et intrigants donnant vie au caractère et au magnétisme du Canada dans une langue claire, simple et prenante.

### De l'important au fantaisiste...

**Un portrait du Canada** vous permet de visiter le pays durant vos moments libres simplement en tournant les pages. Du mont Logan (Yukon) à la rivière Saint-Jean (Nouveau-Brunswick), tâtez le pouls des différentes régions du Canada. Fouillez au cœur même de la société canadienne : Qui sommes-nous? Où vivons-nous? Quelles sont nos croyances? Voyez comment l'économie évolue et pourquoi elle tourne. Découvrez les activités préférées des Canadiens d'aujourd'hui : de l'opéra au hockey jusqu'à l'ordinateur familial. **Un portrait du Canada** offre un examen complet de ce pays unique reflétant des perspectives intéressantes.

### Le territoire, La population, La société, Les arts et les loisirs, L'économie et Le Canada dans le monde

Un tour guidé du paysage physique et humain du Canada vous est offert en six chapitres, chacun est parsemé d'oeuvres pleines d'imagination et est enrichi d'un message personnel sur le fait «d'être Canadien». Ces messages sont partagés par d'éminents Canadiens tels que Myriam Bédard, Gerhard Herzberg et Joe Schlesinger.

### Partagez cette expérience avec votre famille, vos amis et vos collègues

Son format attrayant, son design riche, son contenu intrigant et son prix alléchant font de **Un portrait du Canada** un cadeau idéal à donner ou à recevoir.

**Un portrait du Canada** est en vente à seulement 39,95 \$ au Canada (TPS, TVQ et frais de port et de manutention applicables en sus), 51,95 \$ US aux États-Unis et 59,95 \$ US dans les autres pays. Pour commander, écrivez à Statistique Canada, Division des opérations et de l'intégration, Direction de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6 ou communiquez avec le Centre de consultation régional de Statistique Canada le plus près (la liste figure dans la présente publication). Ou encore, téléphonez sans frais au 1-800-700-1033 et portez les frais à votre compte VISA ou MasterCard ou télécopiez votre commande au (613) 951-1584.
